HOOVER TO STRESS PROSPERITY, INTEGRITY

AS FACTORS IN GOVERNMENTAL MANAGEMENT

REPUBLICAN CAMPAIGN ISSUES FORMULATED BY HOOVER

HAS CONFERENCE WITH PRESIDENT COOLIDGE AT SUMMER WHITE HOUSE

By PAUL R. MALLON

(United Press Staff Correspondent)

Superior, Wis., July 17.—Herbert Hoover has informed President Coolidge he intends to stress the issues of continued prosperity and integrity in his campaign for the White House.

The republican candidate indicated he would name these two as the dominant issues in the speech of acceptance of the nomination at Palo Alto, Calif., August 11, the United Press was reliably informed today.

These are practically the same issues upon which Mr. Coolidge successfully sought election in 1924. Mr. Coolidge is understood to have agreed the issues were well selected.

The issue of prosperity will be widely used by Hoover himself in his speeches during the campaign, while that of competent governmental management will be stressed by the other campaigners.

That information coming privately and unofficially, but authoritatively from the conferences which Hoover and Mr. Coolidge have been holding at the president's summer lodge, was the first news emanating from the candidate himself as to the issues he will name in his acceptance speech.

Hoover also discussed with the president the advisability of announcing immediately acceptance of his resignation as secretary of commerce.

Mr. Coolidge informed Hoover he would do everything he possibly could to help the ticket in November. The president indicated he would make two or three speeches, one before he left here and all urging the electorate to endorse the republican party.

The president is expected to make a speech in Massachusetts to his home state voters in the fall.

Hoover will leave Duluth, Minn., across the lake from here, at 6 P. M., after a two-day visit with the retiring chief executive.

An automobile parade from Superior six miles to Duluth has been arranged. There Hoover will again board the train to resume his journey to the Pacific coast. He will arrive in San Francisco Friday.

The nominee enjoyed his stay here with the president. They went fishing in the Brule and the lake for more than three hours late yesterday. Sixteen trout were said to have been caught, eight each.

Hoover is a much more experienced fisherman than the president and is honorary president of the Isaac Walton League.

It was announced Mr. Coolidge had accepted an invitation to speak July 29 at Cannon Falls, Minn., at the unveiling of a civil war monument.

Mr. Coolidge has not yet decided upon a successor to Hoover as secretary of commerce and declined to make the announcement of acceptance of Hoover's resignation today. At the summer White House it was said Hoover had some matters to clear up on the Pacific coast. These are merely incidental and the real reason for postponing the announcement was the difficulty over naming the successor, the United Press was informed upon indisputable authority.

The announcement may not be made for several weeks.

Superior, Wis., July 17.—The dispute as to who is the more expert fisherman, President Coolidge or Herbert Hoover, the republican presidential nominee was settled today by the president himself.

Word came from the summer White House that Mr. Coolidge considers Hoover a "much more expert fisherman."

Announcement was made yesterday that the president and the nominee had caught 16 fish, eight each. The announcement immediately caused heated debates around the lakes as to whether such a feat of equal division of the catch could actually be accomplished and whether the announcement was made to cover someone's delinquencies.

Russ Ice Breaker Continues on Mission of Mercy

GIRL OF TWO IS REUNITED WITH HER PARENTS

Chicago, July 17.—(U.P.)—Elizabeth Hoschen, 2, has been reunited here with her parents, Mr. and Mrs. Hans Hoschen, after a trip from Hanover, Germany, unaccompanied.

In November, 1927, as her parents completed preparations for their emigration, Elizabeth contracted measles, and was left behind, with her grandmother.

HONORS PAID LATE CAPTAIN EMILIO CARRANZA

BODY OF YOUTHFUL AVIATOR IS ABOUT TO START ON JOURNEY HOME

ONE OF MOST IMPOSING MILITARY FUNERALS ARRANGED IN NEW YORK

New York, July 17.—(U.P.)—A bugler will sound taps and three volleys will be fired while ten thousand soldiers stand at attention outside Pennsylvania station tomorrow afternoon as the body of Captain Emilio Carranza, youthful Mexican aviator, starts on its journey to Mexico City.

One of the most imposing military funerals the city has ever seen has been arranged as New York's final honor to the flier, who died Thursday when his monoplane crashed in New Jersey during an electrical storm.

At 3 P. M. tomorrow, services will be held in the upper Broadway funeral chapel, where the body has lain in state since Sunday.

A gun caisson, attended by West Point cadets, will bear Carranza's body in the procession of soldiers, and civic and fraternal organizations to Pennsylvania station.

The procession will go down Broadway, and to the railroad station where a special train of three Pullmans, a diner and an observation car containing a catafalque will leave at 4:05 P. M. for the Mexican border.

Mexico City, July 17.—A squadron of military planes will circle over the train bringing Captain Emilio Carranza to Mexico and form a funeral cortege of the air when the body enters the city.

The military planes probably will meet the train at Queretaro and accompany it into the capital.

500 NICARAGUAN REBELS SURRENDER TO U. S. SINCE JULY 1

Washington, July 17.—(U.P.)—Nicaraguan rebels who have surrendered since July 1 now total nearly 500, the navy department announced today.

The last surrender to American marines was at Solomo, where 173 turned in their arms July 15 and 16, according to a message from Rear Admiral David Sellers, commander of the navy's Nicaraguan special service squadron.

MISSISSIPPI COLORED POLITICIAN SUSPENDED

Washington, July 17.—(U.P.)—Attorney General Sargent today suspended Perry W. Howard, Mississippi colored politician, from his post as a special assistant attorney general. Howard is under indictment in the Biloxi, Miss., patronage investigation.

Howard, indicted for allegedly selling patronage, is alleged to have disposed of a deputy United States marshalship for \$1,500.

HEAVY VOLCANIC ERUPTIONS ON ALASKAN ISLAND

Dutch Harbor, Alaska, July 17.—(U.P.)—Heavy volcanic eruptions on Akutan Island, one of the Aleutian chain, were reported here today by the U. S. coast guard cutter Unalga.

The inhabitants of native villages on the island also are being terrorized by earthquake shocks, the Unalga reported.

Steam and lava were seen coming from the crater of the volcano on the island, officers of the boat said.

Obregon is Assassinated

LOYALTY TO THE FRATERNITY IS EMPHASIZED

THE ORGANIZATION OWES ITS STRENGTH TO INDIVIDUAL MEMBERS

SOUNDS WARNING AGAINST TOO GREAT INTEREST IN SOCIAL AFFAIRS IN COLLEGE

Breezy Point, Minn., July 17.—Mrs. Hal Lebrecht, Grand President of the Kappa Alpha Theta fraternity, gave an authoritative and significant address in the opening session at Edgewater convention hall yesterday morning.

With the keynote of "soundings" to determine whether the simple, direct, universal purposes which the founders stated for the fraternity sixty years ago have inherent value and working power today or whether members are clinging to a time honored but worn-out and empty phraseology, Mrs. Lebrecht gave an incisive and clear cut opening address.

Mrs. Lebrecht pointed out that the self reliance and independence of spirit in the modern girl was matched by the freedom from the conventional standard of their time which led the founders of Kappa Alpha Theta to establish a Greek letter society for women in a college where women students in themselves were considered a dangerous novelty.

Mrs. Lebrecht stressed loyalty to the fraternity as being an emphasis on individual responsibility since the organization owes its strength to the individual members. The fraternity women, with the training of association in the college chapter finds it in public spirit, in broadened sympathies, in trained intelligence, gifts for bettering conditions outside the small circle of chapter companionship.

Mrs. Lebrecht sounded a warning against too great interest in social activities in college and urged that these be held to their normal places in the existence of the chapter. "The chapter which can pride itself only upon its popularity and social prestige has but an uncertain and local importance and is a failure from every other point of view."

"There is a mighty challenge to fraternity people in colleges today and out of college, a challenge which there is no question of our ability to meet if we convert the true metal of our idealism into tools for our everyday work," concluded Mrs. Lebrecht.

Four aims in strengthening fraternity service to its members were outlined at the San Francisco convention in 1926 and have been closely adhered to in the past four years, according to the detailed report made to the delegates yesterday by Grand Council.

These plans were to work for improved scholarship; to keep members in college until degrees were earned; to provide more adequate chapter houses with rooms properly equipped for study; and to present to alumnae chapters plans for reaching and interesting non-member residents of their cities. And these ambitions have been realized to a large extent, according to officers' reports made at convention.

A report breathing human interest was that of Mrs. J. M. Meeklin, alumnae secretary, of Hanover, N. H., on the Friendship Fund. A little more than a year old, supported entirely by voluntary subscriptions, this fund has grown to amazing proportions. The fund is destined to take care of Thetas needing financial assistance outside of the province of the new Scholarship Fund or the Endowment Fund.

The difficulties of an editor and how these might be lessened by contributors was the tenor of L. Pearl Green's report as Grand Secretary and editor of the Theta Journal. The discussion of pictorial sections occupied part of Miss Green's talk. The routine of making a pictorial section, expense and method of arranging it was explained. Miss Green closed with a plea to chapter editors to make the hazards of the editor's task less by sending in the various articles and chapter letters promptly and in correct form. In the last two years of Theta ac-

Mexico City, July 17.—(U.P.)—General Alvaro Obregon, president-elect of Mexico, was assassinated shortly after 2 p. m. today in the town of San Angel, close to the capital. Assassins, who were unknown, fired five shots into the general's body.

Obregon, hero of many Mexican revolutions, was to have assumed office December 1. He had announced he would continue the policies of President Calles including those pertaining to the religious question. President Calles during his term as president had instituted reforms in the church laws which had caused much dissension among the Roman Catholics.

KU KLUX KLAN WILL NOT ENTER POLITICS THIS YEAR

Chicago, July 17.—(U.P.)—The Ku Klux Klan will not enter politics this year, Dr. Hiram Wesley Evans, imperial wizard, here for the biennial klonovocation which starts today, announced.

Because of the "hot issues" involved, particularly that of religion, the Klan will take no part in the campaigns, Evans said. The secret klonovocation, at which it was reported Senator Helms, Alabama, would speak, is for Klan business only, he said.

Grand dragons from practically every state are here for the meeting.

activity, the work of filing the material of the national archives has been completed, reported Catherine Tillotson, Alpha, national archivist, at yesterday's session.

Today's business session includes a post-initiation demonstration. Fraternity service from undergraduate to alumna will be discussed. Committees will be announced and these include nominating, recommendations, place of next convention, resolutions, alumnae chapter contest for 1928-1930 and fellowship award. The alumnae session will be held in the afternoon. At 4 P. M. the grand council and college delegates hold a session. At 8 P. M. there will be an exhibit night with Alpha Phi and Alpha Rho in charge. Mrs. Stephens will be in charge of the song fest.

NIGHT CLUBS IN RUSSIAN CEMETERY

Leningrad, July 17.—(U.P.)—Nightly bacchanalias among the tombs of Smolensk cemetery in an outlying part of Leningrad were revealed in a report by police that "several dozens" of women had been arrested in a raid on the graveyard. Several of the more elaborate of the sepulchres had been furnished to represent night clubs and were well stocked with wines and vodka.

AIMEE DEIGNS NO REPLY TO HER MOTHER

'EXCEPT FOR GENERAL DENIALS WHEN NEWSPAPERS FORCE THEM'

'MOTHER'S REPUTED ATTACKS AGAINST ME ARE NOT WELL BASED'

Los Angeles, July 17.—(U.P.)—Aimee Semple McPherson has decided that "except for general denials when the newspapers force them," she will not answer any statements given out by her mother, Mrs. Minnie Kennedy.

"The slightest investigation of my own and Angelus temple's affairs," she said before she left for Lake Tahoe last night, "will show that mother's reputed attacks against me are not well based."

"It would make me look ridiculous to be constantly answering such charges as she is said to be making. Mother had control of all finances at the church while she was here so it is evident her claim that I used large funds mysteriously can't hold any water."

"The kidnapping story has been closed long ago. I don't think I should be annoyed whether mother understands it or not."

The evangelist would comment only briefly on the report that members of her congregation were investigating to determine if she is the daughter of Mrs. Kennedy.

"Certainly she is my mother," the evangelist said. "Birth records will prove that."

Mrs. Kennedy, now living in Seattle, Wash., has issued a series of interviews tending to attack Mrs. McPherson.

St. Paul, July 17.—(U.P.)—Several suspects were arrested here today in connection with the theft of \$755, the life savings of Gust Moldenhauer, railroad car cleaner. The money, partly in gold and the remainder in gold notes, was taken from a trunk in the cleaner's room.

BANDIT 75 YEARS OLD SHOTS CAFE MAN IN ARM

St. Louis, Mo., July 17.—(U.P.)—A bandit described as 75 years old shot Fred Flederman, 64, restaurant proprietor, in the right arm at midnight when the restaurant man resisted the aged man's attempt to hold up the establishment.

Flederman said the bandit looked so old and harmless that it didn't seem he would shoot.

LUST FOR GOLD SETS FORESTS OF NORTH ABLAZE

SITUATION IN MINERAL AREAS OF MANITOBA DEPLORABLE

'GREEN' PROSPECTORS ARE BELIEVED RESPONSIBLE FOR OUTBREAK

Winnipeg, Man., July 17.—(U.P.)—The lust for gold has set the forests of the north ablaze.

The situation in the mineral areas of Manitoba and across the Saskatchewan border is the worst it has been since the forestry department commenced patrol by airplanes. Over the entire region, fires are threatening to overtax the resources of the service.

The presence of "green" prospectors in the area is believed to be responsible for the outbreak.

GOV. SMITH WILL NOT POSE FOR 'BOLONEY PICTURES'

Albany, N. Y., July 17.—(U.P.)—Governor Smith will not pose for "boloney pictures" even if they are good publicity, he has informed news photographers.

A group of photographers who caught the governor standing near a brick pile at the state office building attempted to get him to pose laying a brick.

"Nothing doing," the governor said. "That's a boloney picture. Everybody knows I can't lay bricks and if a real bricklayer caught me at it, he'd say boloney too."

JOIN IN SEARCH FOR UNMASKED BANDIT

Clarkfield, Minn., July 17.—(U.P.)—County and state authorities joined today in the search for an unmasked bandit who held up the Citizens State bank here and escaped with \$1,500 late Monday.

The robber forced A. M. Andriksen, cashier into the vault, emptied the cash drawer of the \$1,500 but overlooked \$25,000 in liberty bonds in the vault.

The robber fled in a motor car. Andriksen escaped from the vault by working the combination with a pocket knife.

SEEKS TO SAVE CAPT. MARIANO, SERIOUSLY ILL

ONE LEG WAS FROZEN AND GANGRENE HAS SET IN

KRASSIN WOULD CONTINUE THE SEARCH FOR 12 OTHER MEN IN ARCTIC

By EUGENE LYONS

(United Press Staff Correspondent)

Moscow, July 17.—The Russian ice breaker Krassin steamed swiftly through northern waters today in an attempt to save the life of one of the 16 men she had so successfully brought out of the ice bound wastes of the north.

Captain Adalberto Mariano, rescued off an ice floe near Foy Island, reportedly was in a serious condition. One leg was badly frozen while he, Captain Filippo Zappi and their late leader, Finn Malmgren, attempted to walk to aid.

It was reported today that gangrene had set in and that Mariano's condition was critical.

So serious is Mariano's condition that the commander of the Krassin messaged the Citta Di Milano, supply ship of the Italia flight, he met at the entrance to Kings Bay. There Mariano will be transferred so he may get expert medical treatment.

As soon as Mariano has been transferred, the Krassin—which now has been listed as one of the greatest mercy ships in modern history—will continue on to Advent Bay with the other 15 men she rescued from what appeared to be an almost inevitable death in the desolate, ice-bound north. When the Krassin has disembarked her rescued men the ice-breaker will refuel, and start out to try and find 12 other men lost in the Arctic. These groups include the Roald Amundsen party of six and the six men of the Italia who floated away with the envelope of that craft.

Rome, July 17.—Premier Mussolini has messaged Captain Thornborg, commander of the group of Swedish flyers who have aided in Italia rescue work, thanking them for their service. "I have followed you day by day in the risks you faced to accomplish your gallant and generous work. I thank you, your pilots and all those who collaborated with you," the message said.

He also sent a message to Captain Sarko, Finnish flyer, thanking him for "your daring flight to rescue Captain Sora's group."

Stockholm, Sweden, July 17.—Several Norwegian newspapers are conducting a campaign for an investigation into the death of Prof. Finn Malmgren, not, they say, because of suspicion regarding the circumstances in which Malmgren died on the ice, but in order to quiet rumors which they believe baseless.

67 VICTIMS OF FOOD POISONING

Boston, July 17.—(U.P.)—Victims of food poisoning, 67 persons were still under treatment at four Greater Boston hospitals today, while more than 125 others had been discharged after receiving first-aid treatment.

Those stricken became ill after partaking of box lunches purchased from a chain restaurant concern. Corn beef sandwiches or chocolate cream pies were believed the source of the poison.

Dr. N. A. Nelson and a corps of workers were assigned to the case by the state health department today and began an analysis of the food samples obtained from the company.

All but one of the 67 victims still under treatment in four Greater Boston hospitals today were recovering, and it was believed that the only man whose name was on the danger list also might recover.

CHARGES MADE AGAINST JUDGE

Oklahoma City, Okla., July 17.—(U.P.)—Statements purporting to show Chief Justice Fred P. Branson of the Oklahoma supreme court traded in lease holdings of "one of the large litigants in his court for profit and considerations not revealed" were published today by Carl C. Magee, editor of the Oklahoma News.

First Photo of Arctic Rescuers

Smashing, crashing through the floating pack ice off Northeastland, the Russian ice-breaker Krassin is continuing its work of picking up survivors of the Noble polar expedition. This picture is made available through the courtesy of the Amtorg Trading Corporation and shows

left to right, Captain Egge, commanding the Krassin; Professor Samoilovich, adviser to the Russian ministry of aviation; an unnamed officer, and Pilot Chukhnovsky, the flier who first sighted the marooned Italia men.

SITUATION IN MINERAL AREAS OF MANITOBA DE- PLORABLE

"GREEN" PROSPECTORS ARE BE- LIEVED RESPONSIBLE FOR OUTBREAK

Winnipeg, Man., July 17.—(U.P.)—The lust for gold has set the forests of the north ablaze.

The situation in the mineral areas of Manitoba and across the Saskatchewan border is the worst it has been since the forestry department commenced patrol by airplanes. Over the entire region, fires are threatening to overtax the resources of the service.

The presence of "green" prospectors in the area is believed to be responsible for the outbreak.

GOV. SMITH WILL NOT POSE FOR 'BOLONEY PICTURES'

Albany, N. Y., July 17.—(U.P.)—Governor Smith will not pose for "boloney pictures" even if they are good publicity, he has informed news photographers.

A group of photographers who caught the governor standing near a brick pile at the state office building attempted to get him to pose laying a brick.

"Nothing doing," the governor said. "That's a boloney picture. Everybody knows I can't lay bricks and if a real bricklayer caught me at it, he'd say boloney too."

JOIN IN SEARCH FOR UNMASKED BANDIT

Clarkfield, Minn., July 17.—(U.P.)—County and state authorities joined today in the search for an unmasked bandit who held up the Citizens State bank here and escaped with \$1,500 late Monday.

The robber forced A. M. Andrisen, cashier into the vault, emptied the cash drawer of the \$1,500 but overlooked \$25,000 in liberty bonds in the vault.

The robber fled in a motor car. Andrisen escaped from the vault by working the combination with a pocket knife.

SEEKS TO SAVE CAPT. MARIANO, SERIOUSLY ILL

ONE LEG WAS FROZEN AND GANGRENE HAS SET IN

KRASSIN WOULD CONTINUE THE SEARCH FOR 12 OTHER MEN IN ARCTIC

By EUGENE LYONS
(United Press Staff Correspondent)

Moscow, July 17.—The Russian ice breaker Krassin steamed swiftly through northern waters today in an attempt to save the life of one of the 16 men she had so successfully brought out of the ice bound wastes of the north.

Captain Adalberto Mariano, rescued off an ice floe near Foy Island, reportedly was in a serious condition. One leg was badly frozen while he, Captain Filippo Zappi and their late leader, Finn Malmgren, attempted to walk to aid.

It was reported today that gangrene had set in and that Mariano's condition was critical.

So serious is Mariano's condition that the commander of the Krassin messaged the Citta Di Milano, supply ship of the Italia flight, he met at the entrance to Kings Bay. There Mariano will be transferred so he may get expert medical treatment.

As soon as Mariano has been transferred, the Krassin—which now has been listed as one of the greatest mercy ships in modern history—will continue on to Advent Bay with the other 15 men she rescued from what appeared to be an almost inevitable death in the desolate, ice-bound north. When the Krassin has disembarked her rescued men the ice-breaker will refuel, and start out to try and find 12 other men lost in the Arctic. These groups include the Roald Amundsen party of six and the six men of the Italia who floated away with the envelope of that craft.

Rome, July 17.—Premier Mussolini has messaged Captain Thorneborg, commander of the group of Swedish flyers who have aided in Italia rescue work, thanking them for their service.

"I have followed you day by day in the risks you faced to accomplish your gallant and generous work. I thank you, your pilots and all those who collaborated with you," the message said.

He also sent a message to Captain Sarko, Finnish flyer, thanking him for "your daring flight to rescue Captain Sora's group."

Stockholm, Sweden, July 17.—Several Norwegian newspapers are conducting a campaign for an investigation into the death of Prof. Finn Malmgren, not, they say, because of suspicion regarding the circumstances in which Malmgren died on the ice, but in order to quiet rumors which they believe baseless.

67 VICTIMS OF FOOD POISONING

Boston, July 17.—(U.P.)—Victims of food poisoning, 67 persons were still under treatment at four Greater Boston hospitals today, while more than 125 others had been discharged after receiving first-aid treatment.

Those stricken became ill after partaking of box lunches purchased from a chain restaurant concern. Corn beef sandwiches or chocolate cream pies were believed the source of the poison.

Dr. N. A. Nelson and a corps of workers were assigned to the case by the state health department today and began an analysis of the food samples obtained from the company.

All but one of the 67 victims still under treatment in four Greater Boston hospitals today were recovering, and it was believed that the only man whose name was on the danger list also might recover.

CHARGES MADE AGAINST JUDGE

Oklahoma City, Okla., July 17.—(U.P.)—Statements purporting to show Chief Justice Fred P. Branson of the Oklahoma supreme court traded in lease holdings of "one of the large litigants in his court for profit and considerations not revealed" were published today by Carl C. Magee, editor of the Oklahoma News.

First Photo of Arctic Rescuers

Smashing, crashing through the floating pack ice off Northeastland, the Russian ice-breaker Krassin is continuing its work of picking up survivors of the Noble polar expedition. This picture is made available through the courtesy of the Amtorg Trading Corporation and shows, left to right, Captain Egge, commanding the Krassin; Professor Samoilovich, adviser to the Russian ministry of aviation; an unnamed officer, and Pilot Chukhnovsky, the flier who first sighted the marooned Italia men.

BRAINERD
25 YEARS AGO

From the Daily Dispatch

July 17, 1903

Miss Maggie Atherton leaves tomorrow for Duluth and will go from there for a trip down the lakes.

Dr. Rounds yesterday moved his office from the Towne-McFadden building to the new Bane block on Seventh street, where he has a very nice suite of rooms.

The little village of Backus is said to have taken quite a building boom. J. L. Smith has just built a store there, 24 by 40 with a large addition to the rear and J. H. Koop is building a new store building two stories high, the upper story to be used for a hall room, lodges etc.

Licenses have been issued to marry for the past two days to the following couples: Fred Hansen, Cass county, and Clara Iowa Connor, of Crow Wing county; Leopold Lyonals to Mary Olsen, both of Crow Wing county; Harry Stone, of Kanabec county, and Helen Archer, of Crow Wing county; Alexander Lamont to Louisa Lamont, both of this county.

Mrs. Henry Linnemann and daughter returned this noon from a lengthy visit with her parents, near Faribault, Minn.

The J. W. Wright home was badly gutted by flames before the firemen could get the fire under control. The household goods are a complete loss. The fire was started when Mr. Wright dropped a kerosene lamp which he was carrying, when he stubbed his toe.

Meeting Postponed

The meeting to paint the chairs at the Swedish Bethany church has been postponed until further notice.

Swedish Baptist Ladies Aid

The ladies aid of the Swedish Baptist church will meet Wednesday afternoon in the basement of the church at 2:30 o'clock. Hostesses are Mrs. Maxe and Mrs. John Johnson. A large attendance is desired.

Baptist Mission Circle

The Mission Circle of the First Baptist church will meet at the home of Mrs. Walter Minske 1115 South Fifth street, on Wednesday afternoon at 3 o'clock.

Mrs. Louis Nelsen Honor Guest

Mrs. Louis Nelsen, 708 South Seventh street, was honor guest at a family reunion given at the Bentley cottage on South Long Lake. Among the guests were Mr. and Mrs. Nelsen and son, Mr. and Mrs. Robert Nelsen and daughter of Devils Lake, N. D., Mr. and Mrs. Martin Nelsen and son and daughter, Mr. and Mrs. M. L. Jones and daughter, of Duluth, Mr. and Mrs. Gorman Nelsen of Minneapolis, Mr. and Mrs. Louis Nelsen, Jr., of Manhattan, Nevada. This is the first time the family has all been together in 23 years.

FRIGHTENED BY SNAKE,
TAKEN TO HOSPITAL

Pottsville, Pa., July 17.—(UP)—Louis Karbosky, 23, was so badly frightened when a snake twined itself about him that he had to be taken to a hospital.

He had almost torn the snake's head off with his hands, although he was not bitten.

at HALL'S

CHARLIE CHAPLIN in "THE CIRCUS"

Charlie Chaplin in "The Circus"

Peanuts . . . sawdust . . . pink lemonade . . . clowns, tigers, elephants, roaring lions, acrobats, wire-walkers, and Charlie Chaplin in his brand new comedy will all be at the Lyceum theatre this Wednesday for three days. Written, directed and produced by Charlie Chaplin, "The Circus" was two years in the making and it is the first Chaplin comedy since "The Gold Rush."

Charlie plays a wandering lad who is mixed up in a series of hilarious adventures, chases, arguments and omissions that land him in "The Circus" as a very fine fellow. Merpa Kennedy, with red hair and just five feet, two, with eyes of blue, is his leading lady; she makes her screen debut in the role.

A Delicate Problem of the Country's Youth

Juvenile Delinquency is one of the great tragic developments of present day America that the public must take cognizance of. It is a problem that threatens the future if not the very life of the youth of every family. Changing living conditions, changing moral standards, coupled with growing parental neglect, have combined to produce a mental attitude in the rising generation that is causing the authorities and thinkers of the Nation grave concern.

In "The Road to Ruin," which comes to the Park theatre next Monday, this problem is dealt with frankly and fearlessly, and the inevitable disastrous consequences of youthful folly and parental negligence is most forcibly shown. As Sally Canfield, the innocent and trusting school girl, exotic Helen Foster, gives a performance that has seldom been equalled on the screen.

Hugo's First Tragedy

Victor Hugo composed his first tragedy, "Irtamene," when he was twelve years old.

GOV. ALFRED E. SMITH
TO TAKE SHORT REST

Albany, N. Y., July 17.—(UP)—Governor Alfred E. Smith will try to forget for the next ten days or two weeks that he is a presidential candidate or chief executive of this state—and attempt to rest a bit.

While putting aside campaign worries, the governor will, however, turn his attention to his acceptance speech. He will begin to gather data for that address in which he will outline his policies. The speech is expected to be made about the middle of August.

Smith has no formal vacation plans. He will be guided by his mood. He may loaf about the executive mansion most of the time, or he may fish for a few days or turn to the woods for relaxation.

George B. Graves, assistant to the governor, will take over the reins in all matters except those which law requires the government handle personally.

25 VICTIMS OF AERIAL
BOMB EXPLOSION

Rankin, Pa., July 17.—(UP)—Six of 25 persons taken to hospitals here last night, victims of an aerial fireworks bomb explosion, were in a critical condition today.

The bomb, part of a fireworks display which climaxed a celebration by Italians in honor of Our Lady of Mt. Carmel, shot skyward, fell and then exploded in a crowd of 3,000 persons.

Several of the injured, eight of whom were children, probably will lose their sight, physicians said.

BUSINESS AND
FARMING CONDITIONS
ARE IMPROVING

Minneapolis, July 17.—(UP)—Business and farming conditions in the ninth federal reserve district experienced a general improvement in June past compared to June, 1927, the Federal Reserve bank of Minneapolis revealed today.

Debits to individual accounts this year were 18 per cent larger than a year ago, value of checks collected from county banks increased 18 per cent, carloadings of miscellaneous freight, shipment of flour, and linseed products were also greater this year.

Prices of all farm products were higher than last year with the exception of durum wheat and potatoes.

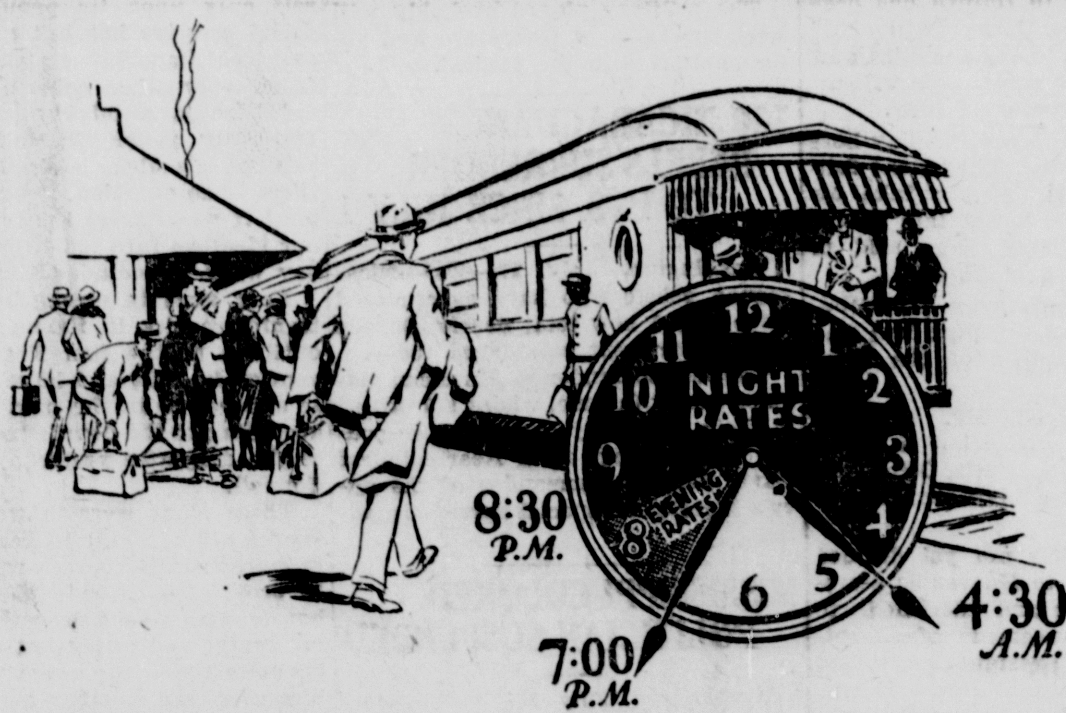

HARRY K. THAW
COMES HOME
FROM EUROPE

New York, July 17.—(UP)—Harry K. Thaw came home from Europe today and conveyed the impression to ship reporters that he thought England had given him a "dirty deal."

"Everything was all right everywhere else," Thaw said, discussing his conclusion at the gates of Great Britain. "I went all over France and Germany and nobody bothered me at all—maybe an occasional newspaper man—but they are good fellows."

PARK 3 Days Starting Monday, July 23
Children under 16 not admitted unless accompanied by parents.

"Voice Mileage" for Station-to-Station Calls
Costs You Less After 7 P. M.

You can obtain "voice mileage" at lower cost if you "travel" by long distance telephone after 7 p. m. and ask to talk with anyone at the telephone called.

Evening Rates apply on station-to-station calls made between 7 and 8:30 p. m. at which time the charges are about one-fourth less than the day rate.

Night rates are in effect on such calls from 8:30 p. m. to 4:30 a. m. at which time the charges are about half of the day rate.

Reduced evening and night rates apply when the day rate is 40 cents or more, with a minimum reduced rate of 35 cents. When the day station-to-station rate is 45 cents or less, the evening rate is the same as the night rate.

NORTH PRAIRIE

Sid Skilling and wife of Brainerd visited at the Elmer Peterson home Wednesday evening.

Mr. and Mrs. M. F. Shannon have as their guests Mrs. Goslee of Backus and Mrs. C. Troxel of Laporte.

Mr. and Mrs. Will Groshong announce the birth of a son on Friday, July 6.

Mrs. Ole Anderson and Mrs. Leroy Sewell went to Brainerd Tuesday to be in attendance at the meeting of the millinery club project at the court house.

The ladies aid meets with Mrs. J. H. Peterson Thursday, July 18. Everyone is invited to attend.

There was no Sunday school in the West Daggett Brook church Sunday as that school joined with seven others in the group gathering at Long Lake.

Mrs. Steve Tougas was called to Little Falls Monday by the death of a nephew, a son of Mr. and Mrs. Charles Lidd of that place. Funeral services were held on Tuesday.

Mrs. Theodore Dagle and children of Cloquet are visiting at the home of Mr. and Mrs. Steve Tougas.

Mr. and Mrs. Walter Peterson spent Sunday in Brainerd.

Mr. and Mrs. Clifford Anderson moved into their new house on Monday.

Mileusnich-Chambers

Miss Grace Chambers of Irondale was married to Mike Mileusnich, son of Mr. and Mrs. Louis Mileusnich, of Crosby Saturday afternoon, Judge L. B. Kinder officiating.

Mr. and Mrs. Mileusnich will reside at Ironton where the groom is employed by Butler Brothers.

BRAINERD 25 YEARS AGO

From the Daily Dispatch

July 17, 1903

Miss Maggie Atherton leaves tomorrow for Duluth and will go from there for a trip down the lakes.

Dr. Rounds yesterday moved his office from the Towne-McFadden building to the new Bane block on Seventh street, where he has a very nice suite of rooms.

The little village of Backus is said to have taken quite a building boom. J. L. Smith has just built a store there, 24 by 40 with a large addition to the rear and J. H. Koop is building a new store building two stories high, the upper story to be used for a hall room, lodges etc.

Licenses have been issued to marry for the past two days to the following couples: Fred Hansen, Cass county, and Clara Iowa Connor, of Crow Wing county; Leopold Lyons to Mary Olsen, both of Crow Wing county; Harry Stone, of Kanabec county, and Helen Archer, of Crow Wing county; Alexander Lamont to Louisa Lamont, both of this county.

Mrs. Henry Linnemann and daughter returned this noon from a lengthy visit with her parents, near Faribault, Minn.

The J. W. Wright home was badly gutted by flames before the firemen could get the fire under control. The household goods are a complete loss. The fire was started when Mr. Wright dropped a kerosene lamp which he was carrying, when he stubbed his toe.

Meeting Postponed

The meeting to paint the chairs at the Swedish Bethany church has been postponed until further notice.

Swedish Baptist Ladies Aid

The ladies aid of the Swedish Baptist church will meet Wednesday afternoon in the basement of the church at 2:30 o'clock. Hostesses are Mrs. Maxe and Mrs. John Johnson. A large attendance is desired.

Baptist Mission Circle

The Mission Circle of the First Baptist church will meet at the home of Mrs. Walter Minske 1115 South Fifth street, on Wednesday afternoon at 3 o'clock.

Mrs. Louis Nelson Honor Guest

Mrs. Louis Nelson, 708 South Seventh street, was honor guest at a family reunion given at the Bentley cottage on South Long Lake. Among the guests were Mr. and Mrs. Nels Nelson and son, Mr. and Mrs. Robert Nelson and daughter of Devils Lake, N. D., Mr. and Mrs. Martin Nelson and son and daughter, Mr. and Mrs. M. L. Jones and daughter, of Duluth, Mr. and Mrs. Gorman Nelson of Minneapolis, Mr. and Mrs. Louis Nelson, Jr., of Manhattan, Nevada. This is the first time the family has all been together in 23 years.

FRIGHTENED BY SNAKE, TAKEN TO HOSPITAL

Pottsville, Pa., July 17. —(UP)—Louis Karbosky, 23, was so badly frightened when a snake twined itself about him that he had to be taken to a hospital.

He had almost torn the snake's head off with his hands, although he was not bitten.

at HALL'S

CHARLIE CHAPLIN in "THE CIRCUS"

Charlie Chaplin in "The Circus"

Peanuts . . . sawdust . . . pink lemonade . . . clowns, tigers, elephants, roaring lions, acrobats, wire-walkers, and Charlie Chaplin in his brand new comedy will all be at the Lyceum theatre this Wednesday for three days. Written, directed and produced by Charlie Chaplin, "The Circus" was two years in the making and it is the first Chaplin comedy since "The Gold Rush."

Charlie plays a wandering lad who is mixed up in a series of hilarious adventures, chases, arguments and omissions that land him in "The Circus" as a very fine fellow. Merna Kennedy, with red hair and just five feet, two, with eyes of blue, is his leading lady; she makes her screen debut in the role.

A Delicate Problem of the Country's Youth

Juvenile Delinquency is one of the great tragic developments of present day America that the public must take cognizance of. It is a problem that threatens the future if not the very life of the youth of every family. Changing living conditions, changing moral standards, coupled with growing parental neglect, have combined to produce a mental attitude in the rising generation that is causing the authorities and thinkers of the Nation grave concern.

In "The Road to Ruin," which comes to the Park theatre next Monday, this problem is dealt with frankly and fearlessly, and the inevitable disastrous consequences of youthful folly and parental negligence is most forcibly shown. As Sally Canfield, the innocent and trusting school girl, exotic Helen Foster, gives a performance that has seldom been equalled on the screen.

Hugo's First Tragedy

Victor Hugo composed his first tragedy, "Irtamene," when he was twelve years old.

GOV. ALFRED E. SMITH TO TAKE SHORT REST

Albany, N. Y., July 17. —(UP)—Governor Alfred E. Smith will try to forget for the next ten days or two weeks that he is a presidential candidate or chief executive of this state—and attempt to rest a bit.

While putting aside campaign worries, the governor will, however, turn his attention to his acceptance speech. He will begin to gather data for that address in which he will outline his policies. The speech is expected to be made about the middle of August.

Smith has no formal vacation plans. He will be guided by his mood. He may loaf about the executive mansion most of the time, or he may fish for a few days or turn to the woods for relaxation.

George B. Graves, assistant to the governor, will take over the reins in all matters except those which law requires the government handle personally.

25 VICTIMS OF AERIAL BOMB EXPLOSION

Rankin, Pa., July 17. —(UP)—Six of 25 persons taken to hospitals here last night, victims of an aerial fireworks bomb explosion, were in a critical condition today.

The bomb, part of a fireworks display which climaxed a celebration by Italians in honor of Our Lady of Mt. Carmel, shot skyward, fell and then exploded in a crowd of 3,000 persons.

Several of the injured, eight of whom were children, probably will lose their sight, physicians said.

BUSINESS AND FARMING CONDITIONS ARE IMPROVING

Minneapolis, July 17. —(UP)—Business and farming conditions in the ninth federal reserve district experienced a general improvement in June past compared to June, 1927, the Federal Reserve bank of Minneapolis revealed today.

Debits to individual accounts this year were 18 per cent larger than a year ago, value of checks collected from county banks increased 18 per cent, loadings of miscellaneous freight, shipment of flour, and linseed products were also greater this year.

Prices of all farm products were higher than last year with the exception of durum wheat and potatoes.

HARRY K. THAW

COMES HOME

FROM EUROPE

New York, July 17. —(UP)—Harry K. Thaw came home from Europe today and conveyed the impression to ship reporters that he thought England had given him a "dirty deal."

"Everything was all right everywhere else," Thaw said, discussing his conclusion at the gates of Great Britain. "I went all over France and Germany and nobody bothered me at all—maybe an occasional newspaper man—but they are good fellows."

"Voice Mileage" for Station-to-Station Calls Costs You Less After 7 P. M.

You can obtain "voice mileage" at lower cost if you "travel" by long distance telephone after 7 p. m. and ask to talk with anyone at the telephone called.

Evening Rates apply on station-to-station calls made between 7 and 8:30 p. m. at which time the charges are about one-fourth less than the day rate.

Night rates are in effect on such calls from 8:30 p. m. to 4:30 a. m. at which time the charges are about half of the day rate.

Reduced evening and night rates apply when the day rate is 40 cents or more, with a minimum reduced rate of 35 cents. When the day station-to-station rate is 45 cents or less, the evening rate is the same as the night rate.

SERIES OF BATTLES IN COLIMA, MEXICO

Mexico City, July 17.—(UP)—Twenty five rebels were killed and 51 injured in a series of battles in the state of Colima between July 9 and 14, according to official war office advices.

Five federal soldiers were killed in the engagement and 17 were wounded. Meanwhile offices of General Alvaro Obregon here announced that anti-Obregon elements had filed on a train in which a number of Obregon supporters were riding at San Martin Texmelucan, in the state of Puebla. Enrique Barbosa, an agrarian leader, was killed.

HEAT WAVE GIVES FATALITIES IN EUROPE

Mannheim, Germany, July 17.—(UP)—Forty bathers in the Rhine between Karlsruhe and Bingen were drowned today while seeking relief from the heat wave.

Rome, July 17.—(UP)—Several deaths occurred today from heat that is causing suffering throughout the country. The temperature at Florence today was 104.

Transparent Soap

Transparent soap is prepared by drying ordinary soap, dissolving it in alcohol, allowing the solution to remain at rest so long as any impurities settle to the bottom, and then pouring off the alcohol liquid and evaporating it until it is of such consistency as to become solid when cooled in molds.

"D. F." Logs

So insistent was Duncan Phyfe, America's famous cabinetmaker, on the highest quality of raw materials that West Indian exporters of mahogany referred to their best timbers as "Duncan Phyfe" logs and marked them with his initials.—Exchange.

ROADSIDE BEAUTY

THE demand of the Louisville Automobile Club that county patrolmen remove advertising signs illegally placed on the right-of-way of county roads is in line with the tendency the country over to preserve the natural beauty of roadsides and to prohibit disfigurement, says the Louisville Courier-Journal.

The Committee on Community Planning of the American Institute of Architects, reporting at the institute's recent convention, spoke of an active popular movement in New England to preserve some of the fine quality typical of the countryside and villages of that region "by stemming the flood of roadside advertising and rest-room shacks which is rapidly disfiguring all sections of rural America."

It was with the same view in mind, no doubt, that prizes a few years ago were offered for beautiful designs for "hot dog" stands. It is an easy enough matter to prohibit shacks, stands and advertisements from the public right-of-way, and from points where they form a hazard, but the law hesitates to restrict the free use of private property. Consequently the problem is difficult when it comes to the shacks and stands that are erected just off the pavement along much-traveled roads to catch the tourists' dollars.

Perhaps the best way to handle the situation is to encourage a better type of architecture for these roadside markets or food and drink stands. If motorists would refuse to patronize the ugly, ill-kept shacks, the solution would be simple. But unfortunately, some tourists are not as discriminating as others.

THE FARMER HIRES A SALESMAN

THE farmer, if he is to keep in step with the rest of the business world, must employ a salesman to sell his goods, just as do manufacturers and retailers, says the Minneapolis Star. He must select a "hired hand" who will know how to sell his product advantageously on 365 days of the year, and not only on one day during a period of flooded markets.

And that is what members of 12,000 farmers' co-operative associations have done, with a total business last year of \$2,400,000,000 in farm produce. Minnesota has taken a leading part in this co-operative move, which is netting wheat, tobacco and cotton producers millions more dollars annually, than when they operated on the individual plan.

Earl Reeves in the American Review of Reviews tells how the American farmer has hired his salesman and gone into the business of marketing in a big way. At the present time, he says, there are 2,700,000 farmers selling their product through co-operative associations, or more than twice the number of co-operative members two years ago. Nearly one-third of the farms of the United States are selling through these agencies.

Co-operation in marketing is slowly but surely lifting the farmer from his slough of despond. It is teaching him to put his occupation on a business basis and to make the profits that are justly due him.

LONG ELECTION HOURS

THE DISPATCH has often brought up the matter of the long election hours that rule in Minnesota and which, in fact, serve to delay election reports. Other states are through with voting, have the results heralded in the papers and presumably have gone to bed, while in Minnesota the boards are still wrestling compiling the returns.

Speaking of a recent election held in Minneapolis, the Tribune of that city states that for some reason that is hard to explain satisfactorily, it is the legal practice in Minnesota to keep polls open from 6 o'clock in the morning until 9 o'clock in the evening. No other state in the union deems it necessary to have such a long election day, and hence such long continuous service for precinct election officials.

It is too much to ask of election officials that they should receive ballots from voters for 15 hours in an unbroken stretch, then spend several more hours in counting, and expect them to do a first rate job of counting. Tired minds do not function well. Tired bodies tempt to carelessness and slurring. If election duties are not well performed under these conditions, the responsibility lies on the law rather than on those who overstress their faculties in trying to conform to the law.

A reasonable recasting of our election laws for balloting ought to insure more accurate counting and would also be a humanitarian move on the part of the state.

THE JAYWALKER

OCCASIONALLY there is an accident in which the motorist is not to blame. We refer to those occasions when the motorist is suddenly confronted by a jaywalker who dodges from between parked cars and steps in the street between intersections.

This person is especially difficult to avoid striking, especially when the jaywalking is done near the "stop and go" sign where cars are compelled to move to avoid blocking traffic at the intersection. Pushed ahead by cars in the rear, a motorist stopping suddenly to avoid a jaywalker, will place himself in danger of being struck at the rear by the string of advancing cars.

There are traffic rules for cars, many of them, and there should also be a few traffic rules for pedestrians. Enforcing both with lead to safer driving and less accidents.

Especially exasperating is the habit of some pedestrians to walk diagonally across a street intersection. Another is to gossip on an intersection. You would not expect an automobile to park in an intersection.

LAST night Mrs. J. C. Wagar of 1402 South Broadway ran a two-line local in the Dispatch mentioning she had currants for sale at 10 cents a quart. In two hours she sold 100 quarts, the entire output of her currant bushes. In addition there was a flood of telephone calls and many visitors at her garden, which is one of the most productive plots on the south side.

RUBE GOLDBERG, the humorist, is to cover the Tunney-Heeny fight. The Rube has a clear record as a picker of winners. He has never failed to pick one and has covered nearly all the big fights in the last twenty years.

A ONE-ARMED, legless aviator may be considered a possibility in flying, but he would not fare well driving a car.

ROADS are feeling the improving effect of needed rains.

Attractive Sports Dress Featuring Neckerchief

Myrna Loy, "movie" star of the picture, "State Street Sadie," appears in an attractive sports dress in this production, which can be made at home very easily and cheaply. The blouse is a crepe material in an Indian design in blues and greens. The skirt, which is white, trimmed with a narrow border of blue and green, is plaited. Miss Loy wears a white silk neckerchief with this outfit, and a colored one occasionally just for variety.

Predict Mannish Mode Will Soon Be Routed

The march of the haute couture toward softer and more involved effects continues, says a Paris fashion writer in the New York Herald-Tribune. Everywhere new followers are added, and before the August openings arrive it is freely predicted that the mannish mode will be entirely and forever routed. Appended are some descriptions of the new Paris summer clothes from which you may glean a definite idea of fashion's newest trends.

Elspeth Champcommunal stresses beige for her summer sports models, which are classics in smartness through their simple lines. Three-piece sports ensembles have little jackets or varied coats which descend to three-quarters in length with a most decided flare. Some of the daytime coats have full tops with scarf-ties coming under the full collar at the back. Jersey and velvet surfaced fabrics with diagonal ribbed weaves and gold threads are important, as well as thin woolsens in wool voile qualities.

Nicole Groult is showing about twenty new summer models in which plain velvet, biscuit satin and tones of blue and black combined with light or bright colors predominate. The silhouette is not changed fundamentally, but the chic Parisienne highly approves the elegance of the design in which bodices are easy in line and skirts are invariably voluminous through deep flounces in overskirt effects made to give U or V-shaped yokes. A most decided note is that of side-trim fullness in skirts.

Drecol does not change the silhouette but presents clothes which are exceedingly easy to wear, such as two-piece jersey sports costumes with silk kerchief scarfs, wherein the ends slip through a slide made in colored composition. Hips are fitted, asymmetry is still essential, side V yoke points in skirts are emphasized, and the coat-frock continues as an important part of the collection.

Molyneux designs an important "between-seasons" collection which emphasizes sports dresses—a number with coats—wash or beach dresses in which thin fine woolsens, washable silks, including men's shirtings and Rhodier's kashatille with embroidered designs, and natural linen are very important media.

Redfern has a summer collection in which the underarm motif is featured through bands and plaits, at one side only, with the other side plain and straight. Coats have broad, loose bands which staircase around the coat and sometimes descend to a sharp point in back.

Taffeta Hats Regarded as Smart Little Affairs

The taffeta hat is recognized as a very smart little affair and fetching in the extreme. The thoughtful woman who owns one realizes that it is a fair weather friend and perishable in a downpour. Yet it serves its purpose of chic for many wearings.

One of the softest black taffeta with fitted crown, dips its brim low at the front and turns sharply up at the back to reveal a facing of white peanut straw. Two downy white feathers curl softly back of the right ear.

Tiebacks of Organdie Flowers

Dainty work that can be done at home consists of organdie tie-backs for curtains in the shape of pastel tinted flowers.

Fur Scarf Always Lends That Charm

Use for Every Sort of Piece
to Accompany Dresses,
Coats and Suits.

It is a smart coat that wears its own fur scarf this season. There is a use for every sort of fur scarf to accompany dresses, suits and coats. The coat that is unadorned with fur is very chic and it is particularly suited to the addition of the separate scarf.

From the tiny scarf of one skin to the very elaborate scarfs composed of three foxes, there is a time and place for the scarf. There is nothing more flattering than the use of the fur scarf. The very desirable in fur scarfs which is the height of chic is one of three, four or five skins. In small animals there are many effects dyed to resemble the sable.

In the fox scarfs, the cross fox, the silver fox, or the blue and dyed white foxes, there are any number of interesting scarfs. Smart results are obtained from the single skin,

Three-Fox Scarf Worn by Motion Picture Actress.

but many of the newest scarfs use three animals and hang luxuriously well down the length of the coat.

Suits are always smartly supplemented by the scarfs. The all black scarf was a feature of the spring, but the very light shades in honey beige, sand, pink-beige and other popular tones were later leaders in the fox scarfs.

Frances Hamilton, "movie" actress featured in the film, "No Place to Go," has occasion to wear a most unusual and charming ensemble in one of the scenes. It consists of a frock of jade green flat crepe most interestingly combined with eretonne. With this Miss Hamilton wears a three-fox scarf.

Summer Fashions That Are Now in Limelight

The features of the summer mode as announced by Delineator are as follows:

The two-piece frock in lace is a new and smart summer fashion.

Three points of chic from the evening mode are the uneven hemline, the shirred bodice, and the snugly girdled hipline.

The printed afternoon frock is an important and charming fashion.

Tiered frills hold a place of importance on the bodices as well as the skirts of the newest frocks. Whether they form an ascending or descending line, tiers on a one-piece frock are unusually smart and especially so if they end in flowing draperies, the lower one of which breaks the hemline.

Frocks with the down in back movement have become a very important type for formal wear.

The jutting silhouette is newest for afternoon wear.

New Blazer Jacket Is in Diagonal Stripes

The soft blazer jacket is shown in diagonal stripes and in solid colored flannels. Those in navy blue are finished with brass buttons. Those in black are mostly seen in single-breasted styles with notched collars and are very trim and tailored looking. In the lighter blue cloths the coats have different colors, some of them being finished flat, others with rolled-back revers. Although these coats are usually unlined, some of the shops feel that there will be a call for lined models and are having linings put in to match the coat fabric.

Stripes Revived

Have you wondered whether stripes, too, would join the revival of patterns in fabrics worn by the smart world? Indicative of a revived interest in stripes on both sides of the ocean is Regny's endorsement of this theme in finely lined effect in rayon on a cotton crepe weave for sports frocks.

Bolt Kills Him

Lightning struck the fishing rod of Harold Hamm, Dartmouth student, while he was fishing with comrades in the waters of Lake Winnepesaukee, N. H., killing him instantly. (International Newsreel)

Advertisements bring you USEFUL news

Only yesterday, it seems, we read of balloon tires, radio, electric ranges. Today they count as necessities and magic newcomers are knocking at our doorways . . . electric refrigeration . . . the oil-burning furnace . . . a phonograph that changes its own records.

Even as you read these lines, men in Chicago and Atlanta, Philadelphia and Detroit, are patiently putting together strange devices that, tomorrow, will save labor, cut costs, or give pleasure.

When these inventions become practical, advertisements will be the first to tell you about them: What they will do; how much they cost; where you can get them.

Advertisements bring you personal news, information about the material things that increase your health, comfort and happiness. They tell you the latest practical news phrased in words that are brief, understandable and honest. They help you save money and enjoy the best things in life.

Spend a few minutes each day
reading the advertisements—they'll
bring you much valuable news

ROADSIDE BEAUTY

THE demand of the Louisville Automobile Club that county patrolmen remove advertising signs illegally placed on the right-of-way of county roads is in line with the tendency the country over to preserve the natural beauty of roadsides and to prohibit disfigurement, says the Louisville Courier-Journal.

The Committee on Community Planning of the American Institute of Architects, reporting at the institute's recent convention, spoke of an active popular movement in New England to preserve some of the fine quality typical of the countryside and villages of that region "by stemming the flood of roadside advertising and rest-room shacks which is rapidly disfiguring all sections of rural America."

It was with the same view in mind, no doubt, that prizes a few years ago were offered for beautiful designs for "hot dog" stands. It is an easy enough matter to prohibit shacks, stands and advertisements from the public right-of-way, and from points where they form a hazard, but the law hesitates to restrict the free use of private property. Consequently the problem is difficult when it comes to the shacks and stands that are erected just off the pavement along much-traveled roads to catch the tourists' dollars.

Perhaps the best way to handle the situation is to encourage a better type of architecture for these roadside markets or food and drink stands. If motorists would refuse to patronize the ugly, ill-kept shacks, the solution would be simple. But unfortunately, some tourists are not as discriminating as others.

THE FARMER HIRES A SALESMAN

THE farmer, if he is to keep in step with the rest of the business world, must employ a salesman to sell his goods, just as do manufacturers and retailers, says the Minneapolis Star. He must select a "hired hand" who will know how to sell his product advantageously on 365 days of the year and not only on one day during a period of flooded markets.

And that is what members of 12,000 farmers' co-operative associations have done, with a total business last year of \$2,400,000,000 in farm produce. Minnesota has taken a leading part in this co-operative move, which is netting wheat, tobacco and cotton producers millions more dollars annually, than when they operated on the individual plan.

Earl Reeves in the American Review of Reviews tells how the American farmer has hired his salesman and gone into the business of marketing in a big way. At the present time, he says, there are 2,700,000 farmers selling their product through co-operative associations, or more than twice the number of co-operative members two years ago. Nearly one-third of the farms of the United States are selling through these agencies.

Co-operation in marketing is slowly but surely lifting the farmer from his slough of despond. It is teaching him to put his occupation on a business basis and to make the profits that are justly due him.

LONG ELECTION HOURS

THE DISPATCH has often brought up the matter of the long election hours that rule in Minnesota and which, in fact, serve to delay election reports. Other states are through with voting, have the results heralded in the papers and presumably have gone to bed, while in Minnesota the boards are still wrestling compiling the returns.

Speaking of a recent election held in Minneapolis, the Tribune of that city states that for some reason that is hard to explain satisfactorily, it is the legal practice in Minnesota to keep polls open from 6 o'clock in the morning until 9 o'clock in the evening. No other state in the union deems it necessary to have such a long election day, and hence such long continuous service for precinct election officials.

It is too much to ask of election officials that they should receive ballots from voters for 15 hours in an unbroken stretch, then spend several more hours in counting, and expect them to do a first rate job of counting. Tired minds do not function well. Tired bodies tempt to carelessness and slurring. If election duties are not well performed under these conditions, the responsibility lies on the law rather than on those who overstress their faculties in trying to conform to the law.

A reasonable recasting of our election laws for balloting ought to insure more accurate counting and would also be a humanitarian move on the part of the state.

THE JAYWALKER

OCCASIONALLY there is an accident in which the motorist is not to blame. We refer to those occasions when the motorist is suddenly confronted by a jaywalker who dodges from between parked cars and steps in the street between intersections.

This person is especially difficult to avoid striking, especially when the jaywalking is done near the "stop and go" sign where cars are compelled to move to avoid blocking traffic at the intersection. Pushed ahead by cars in the rear, a motorist stopping suddenly to avoid a jaywalker, will place himself in danger of being struck at the rear by the string of advancing cars.

There are traffic rules for cars, many of them, and there should also be a few traffic rules for pedestrians. Enforcing both with lead to safer driving and less accidents.

Especially exasperating is the habit of some pedestrians to walk diagonally across a street intersection. Another is to gossip on an intersection. You would not expect an automobile to park in an intersection.

LAST night Mrs. J. C. Wagar of 1402 South Broadway ran a two-line local in the Dispatch mentioning she had currants for sale at 10 cents a quart. In two hours she sold 100 quarts, the entire output of her currant bushes. In addition there was a flood of telephone calls and many visitors at her garden, which is one of the most productive plots on the south side.

RUBE GOLDBERG, the humorist, is to cover the Tunney-Heeney fight. The Rube has a clear record as a picker of winners. He has never failed to pick one and has covered nearly all the big fights in the last twenty years.

A ONE-ARMED, legless aviator may be considered a possibility in flying, but he would not fare well driving a car.

ROADS are feeling the improving effect of needed rains.

Attractive Sports Dress Featuring Neckerchief

Myrna Loy, "movie" star of the picture, "State Street Sadie," appears in an attractive sports dress in this production, which can be made at home very easily and cheaply. The blouse is a crepe material in an Indian design in blues and greens. The skirt, which is white, trimmed with a narrow border of blue and green, is plaited. Miss Loy wears a white silk neckerchief with this outfit, and a colored one occasionally just for variety.

Predict Mannish Mode Will Soon Be Routed

The march of the haute couture toward softer and more involved effects continues, says a Paris fashion writer in the New York Herald-Tribune. Everywhere new followers are added, and before the August openings arrive it is freely predicted that the mannish mode will be entirely and forever routed. Appended are some descriptions of the new Paris summer clothes from which you may glean a definite idea of fashion's newest trends.

Elspeth Champcommunal stresses beige for her summer sports models, which are classics in smartness through their simple lines. Three-piece sports ensembles have little jackets or varied coats which descend to three-quarters in length with a most decided flare. Some of the daytime coats have fluted tops with scarf-ties coming under the full collar at the back. Jersey and velvet surfaced fabrics with diagonal ribbed weaves and gold threads are important, as well as thin woolsens in wool voile qualities.

Nicole Groult is showing about twenty new summer models in which plain velvet, biscuit satin and tones of blue and black combined with light or bright colors predominate. The silhouette is not changed fundamentally, but the chic Parisienne highly approves the elegance of the design in which bodices are easy in line and skirts are invariably voluminous through deep flounces in overskirt effects made to give U or V-shaped yokes. A most decided note is that of side-front fullness in skirts.

Drecol does not change the silhouette but presents clothes which are exceedingly easy to wear, such as two-piece jersey sports costumes with silk kerchief scarfs, wherein the ends slip through a slide made in colored composition. Hips are fitted, asymmetry is still essential, side V yoke points in skirts are emphasized, and the coat-frock continues as an important part of the collection.

Molyneux designs an important "between-seasons" collection which emphasizes sports dresses—a number with coats—wash or beach dresses in which thin fine woolsens, washable silks, including men's shirts and Rhodier's kashatole with embroidered designs, and natural linen are very important media.

Redfern has a summer collection in which the underarm motif is featured through bands and plaits, at one side only, with the other side plain and straight. Coats have broad, loose bands which staircase around the coat and sometimes descend to a sharp point in back.

Taffeta Hats Regarded as Smart Little Affairs

The taffeta hat is recognized as a very smart little affair and fetching in the extreme. The thoughtful woman who owns one realizes that it is a fair weather friend and perishable in a downpour. Yet it serves its purpose of chic for many wearings.

One of the softest black taffeta with fitted crown, dips its brim low at the front and turns sharply up at the back to reveal a facing of white peanut straw. Two downy white feathers curl softly back of the right ear.

Tiebacks of Organdie Flowers

Dainty work that can be done at home consists of organdie tie-backs for curtains in the shape of pastel tinted flowers.

Fur Scarf Always Lends That Charm

Use for Every Sort of Piece
to Accompany Dresses,
Coats and Suits.

It is a smart coat that wears its own fur scarf this season. There is a use for every sort of fur scarf to accompany dresses, suits and coats. The coat that is unadorned with fur is very chic and it is particularly suited to the addition of the separate scarf.

From the tiny scarf of one skin to the very elaborate scarfs composed of three foxes, there is a time and place for the scarf. There is nothing more flattering than the use of the fur scarf. The very desirable in fur scarfs which is the height of chic is one of three, four or five skins. In small animals there are many effects dyed to resemble the sable.

In the fox scarfs, the cross fox, the silver fox, or the blue and dyed white foxes, there are any number of interesting scarfs. Smart results are obtained from the single skin,

Three-Fox Scarf Worn by Motion Picture Actress.

but many of the newest scarfs use three animals and hang luxuriously well down the length of the coat.

Suits are always smartly supplemented by the scarfs. The all black scarf was a feature of the spring, but the very light shades in honey beige, sand, pink-beige and other popular tones were later leaders in the fox scarfs.

Frances Hamilton, "movie" actress featured in the film, "No Place to Go," has occasion to wear a most unusual and charming ensemble in one of the scenes. It consists of a frock of jade green flat crepe most interestingly combined with ermine. With this Miss Hamilton wears a three-fox scarf.

Summer Fashions That Are Now in Limelight

The features of the summer mode as announced by Delineator are as follows:

The two-piece frock in lace is a new and smart summer fashion. Three points of chic from the evening mode are the uneven hemline, the shirred bodice, and the snugly girdled hipline.

The printed afternoon frock is an important and charming fashion.

Tiered frills hold a place of importance on the bodices as well as the skirts of the newest frocks. Whether they form an ascending or descending line, tiers on a one-piece frock are unusually smart and especially so if they end in flowing draperies, the lower one of which breaks the hemline.

Frocks with the down in back movement have become a very important type for formal wear.

The jutting silhouette is newest for afternoon wear.

New Blazer Jacket Is in Diagonal Stripes

The soft blazer jacket is shown in diagonal stripes and in solid colored flannels. Those in navy blue are finished with brass buttons. Those in black are mostly seen in single-breasted styles with notched collars and are very trim and tailored looking. In the lighter blue cloths the coats have different colors, some of them being finished flat, others with rolled-back revers. Although these coats are usually unlined, some of the shops feel that there will be a call for lined models and are having linings put in to match the coat fabric.

Stripes Revived

Have you wondered whether stripes, too, would join the revival of patterns in fabrics worn by the smart world? Indicative of a revived interest in stripes on both sides of the ocean is Regny's endorsement of this theme in finely lined effect in rayon on a cotton crepe weave for sports frocks.

Bolt Kills Him

Lightning struck the fishing rod of Harold Hamm, Dartmouth student, while he was fishing with comrades in the waters of Lake Winnepesaukee, N. H., killing him instantly. (International Newsreel)

MOTHER SELECTS SCHOOL WISELY

A successful Fargo business woman, Mrs. Elizabeth Nanson, selected Dakota Business College, Fargo, for her daughter, Frances because here alone would she receive ACTUAL BUSINESS training (copyrighted—unobtainable elsewhere). When Miss Frances was sent to Standard Oil Co. recently—their 190th Dakota employee—she began work with experience, had real practice in business deals, was accustomed to an 8-hour day and a 6-day week.

Watch results. "Follow the Successful", Aug. 6th. Write F. L. Watkins, Pres., 806 Front St., Fargo.

"Horse Shy" Comedy

"Topics of the Day"

The Biggest Laugh Show on Earth!

And now, after the long suspense, your wait is rewarded with the greatest comedy of all time! Side-splitting, rib-shaking—it's funny enough to make a lion roar—and you too!

Advertisements bring you USEFUL news

Only yesterday, it seems, we read of balloon tires, radio, electric ranges. Today they count as necessities and magic newcomers are knocking at our doorways . . . electric refrigeration . . . the oil-burning furnace . . . a phonograph that changes its own records.

Even as you read these lines, men in Chicago and Atlanta, Philadelphia and Detroit, are patiently putting together strange devices that, tomorrow, will save labor, cut costs, or give pleasure.

When these inventions become practical, advertisements will be the first to tell you about them: What they will do; how much they cost; where you can get them.

Advertisements bring you personal news, information about the material things that increase your health, comfort and happiness. They tell you the latest practical news phrased in words that are brief, understandable and honest. They help you save money and enjoy the best things in life.

Spend a few minutes each day
reading the advertisements—they'll
bring you much valuable news

LOUGHRAN STANDS OFF BARRAGE OF BLOWS OF LATZO

ORDER FAIT ELKINS BARRED FROM OLYMPIC TEAM

RETAINS LIGHT HEAVYWEIGHT TITLE LAST NIGHT

AT END OF 10 ROUNDS OF FURIOUS FIGHTING, LOUGHRAN GIVEN DECISION

TWICE WITHIN 7 WEEKS LATZO HAS TAKEN CRACK AT THE TITLE

Wilkesbarre, Pa., July 17.—(UP)—Once again Tommy Loughran has retained his light heavyweight title by a close margin.

In the heart of the "Black Diamond" coal district last night, Loughran stood off the almost constant barrage of blows by Pete Latzo, the courageous Slav. At the end of ten rounds of furious fighting, Loughran was awarded the decision.

Twice within seven weeks Latzo had made valiant but unsuccessful attempts to win the title from Loughran.

Each time Latzo lost, but his margin of defeat was never decisive. Last night, almost always on top of Loughran, failing away with both fists, Latzo kept him moving backward most of the time.

The former Scranton miner started slowly, losing the first three rounds. But in the fourth, he almost drove the champion out of the ring with a brilliant burst of fighting which raised the crowd of 15,000 howling fans to their feet.

Loughran, however, finally worked his miner out of the corner and in a short time was back with the stabbing fists which carried him to the throne.

RISKO AND SQUIRES TAPER OFF FOR BOUT

Detroit, July 17.—(UP)—Johnny Risko, Cleveland, and Johnny Squires, South African heavy-weight, will taper off, beginning today, for their ten-round bout here Thursday night. Jack Dempsey, former heavyweight champion, is expected in Chicago Wednesday on his way here to act as referee of the bout.

FIDEL LA BARBA TO BOX EVANS

Los Angeles, July 17.—(UP)—Fidel La Barba, retired undefeated fly-weight champion, will have a two or three pound weight advantage over Huerta Evans when they meet here tonight in La Barba's comeback attempt.

Evans weighed 118 pounds and La Barba was expected to tip the scales at 121.

Badger Coach Organizes Amateur Baseball Teams

Promoting amateur baseball in Wisconsin is the latest job assigned to Coach Leonard B. Allison, assistant athletic director at the University of Wisconsin, who has been appointed state athletic officer for the American Legion.

Allison was recommended for the post by Maj. John Griffith, commissioner of the western conference, who knew of his work in a similar position while at South Dakota State university. "Stub" as the Badger coach is better known, is making preliminary plans for a Wisconsin state baseball league.

Critz Hits Timely

Hughey Critz (shown in the photograph) has been hitting timely and fielding brilliantly for the Cincinnati Reds this season. The Cincinnati second baseman is one of the best in the league. Had he been going as well last summer the race might have ended differently.

Rainbow Diamond

The word "Kohlnoor" is Persian for mountain of light. The diamond which bears this name is said to have weighed 703 carats originally. It is one of the crown jewels of Great Britain and its present weight is 1061-16 carats.

FREAK SHOT CLUB IS NOW REIGNING

List of Eligibles Presented in American Golfer.

Now that holes-in-one have been made on every year-old course in the land, the journalistic gentlemen who follow the game are digging up eligibles for a more exclusive mythical fraternity, the Freak Shot club.

All you need to become a member are the proper circumstances—and a ton of luck. If you happen to play your ball from its lie in a bird's nest pile into the hole, or if your hopeless hook ricochets from a tree and becomes a hole-in-one, you're in. And you are in good company, as witness this list of eligibles presented in the American golfer.

Willie MacFarlane got in through a barn door—two barn doors, in fact. He was playing against Harry Hampton at the Aberdeen (Scotland) club. They were fighting hole for hole when Willie sliced a drive terrifically. It pulled up near a barn, far off the fairway. But Willie, opening the barn door, found a second door exactly opposite and the hole on a line 200 yards away. He had to hit a hard drive, measured in inches to get through both doors. But he did it, stopping his ball within six feet of the hole.

Joe Demoss, former Wisconsin State champion, was matched with Warren K. Wood at Green Lake, Wis., when his drive from the eighteenth tee came down on top of a flat awning near the clubhouse. Demoss mounted the awning and, teetering precariously, slapped a beautiful brassie shot for the hole, ending a short chip-shot away.

Audrey Boomer was as surprised as his gallery at the play that took him into the Freak Shot club. The English star was playing a Lancashire tournament, when his drive landed in front of a two-foot bank over which he had to play. Using his spoon, he gave the ball a vicious cut. But instead of arching through the air the ball disappeared completely. After a mystified search, Boomer incredulously drew the ball from his pocket. It had struck the soft earth at the top of the bank, rebounded and hidden itself while he still had his arms extended in completing the swing. And what do the rules say about that one?

In the 1926 Canadian Open at Montreal, Leo Diegel, then the titleholder, found himself looking hopelessly on the long eleventh hole in the practice rounds, says the American Golfer article. His one hope to escape the jinx, he concluded, was to drive toward the twelfth fairway, which ran parallel on the right, and let 'er hook. Twice he did it in the regular play, and both times the hooks described a perfect semicircle—but landed 350 yards away and in the center of the eleventh fairway.

Olympic Coach Schulte Never on Cinder Path

Track Coach Henry F. (Indian) Schulte of the University of Nebraska, selected as one of the mentors of the 1928 United States Olympic team, never performed on the cinder path.

To his coaching credit, however, are many past Olympic performers and 1928 potential representatives.

There was the great Robert Simpson, who revolutionized hurdling and set world marks which only recently have been bettered. Jackson Scholz, speed marvel for more than a decade and still among the select, learned the art of sprinting under Schulte's direction. And now there are Roland Locke, holder of the world's furlong record of 20.5 seconds, and Falt Elkins, American decathlon champion and record holder.

PEACE, QUIET NOW REIGNS ON STEAMER

MARKS SET BY DECATHLON STAR IN SPECIAL TRYOUT SUNDAY

SWIMMING COACHES HOPE FOR CLEAN SWEEP AT MEET AT AMSTERDAM

By FRANK GETTY (United Press Staff Correspondent)

Aboard S. S. President Roosevelt, July 17.—With Falt Elkins definitely barred from the American Olympic team, peace and quiet reigns on the President Roosevelt as it steams closer to Amsterdam and the Olympic piad.

Maj. Gen. Douglas MacArthur, president of the Olympic committee, ruled Elkins out after considering the marks set by the decathlon star in a special tryout at New York on Sunday.

Elkins was one of the athletes whom the New York Athletic club offered to send to Amsterdam after the man had failed to make the Olympic team.

Dernell Every, Yale fencer, suffered a flesh wound in the shoulder when his opponent's foil broke during a work-out. It was feared at first that the injury might hinder his chances in the Olympics, but thorough examination disclosed that it was more or less superficial. It was hoped that Every would be able to resume practice today or tomorrow.

Leslie Biers, wrestler, is nursing an injured shoulder but is expected to be all right soon. At a meeting of all team coaches, it was agreed that the athletes aside from the casualties are in excellent condition.

Swimming coaches are exceedingly confident, and hope for a clean sweep at the Olympic games. The rowers also are believed by coaches to have a good chance for a clean-up in their seven events.

Dorothy Hayton, of Pasadena, Cal., the youngest member of the team, celebrated her 13th birthday today.

HEENEY TO GIVE UP HIS NIGHT WORKOUTS REGIME

Fair Haven, N. J., July 17.—(UP)—Tom Heenev has decided to give up his night workouts and train now on will do most of his training in the afternoon.

The challenger for Gene Tunney's title weighs 203 pounds and is anxious to take off about eight of them before crawling into the ring to meet Tunney on July 26.

Easy to Guess

Customer—Have you a book on salesmanship?
Book Clerk—Yeah—(yawn)—we've got one. Look around and maybe you'll see it. I haven't read it myself.

Customer—I should say you haven't.

Proper Securities

"Jones wants to borrow five dollars from me. Is he good for that amount?"

"Yes, with proper securities."

"What would you suggest?"

"A chain and padlock, a pair of handcuffs, and a watchdog."

The Candid Poet

The guests had thoroughly enjoyed the evening of recitations by a local poet. He was the last to depart. The hostess wrung his hand and said: "Poets are born—"

"And," he interrupted, "not paid."

PRESENTED AT COURT

"He says he's been presented at court."

"I'll say he has—twice for embezzlement and forgery once."

Built Like a Derrick

An elephant is capable of lifting about 900 pounds with its trunk.

Watching the Scoreboard

(By United Press)

Yesterday's Hero—Kiki Cuyler who hit a home run and two singles, enabling the Chicago Cubs to win their seventh straight game.

The Chicago White Sox continued their dash up the American league ladder by winning two games from the Boston Red Sox, 4 to 0 and 9 to 1. Faber and Blankenship turned in two well-pitched games, each allowing Boston only seven hits.

The St. Louis Browns went ten innings to take their third straight game from Washington 4 to 2. It was Crowder's eleventh victory of the season.

Pittsburgh stretched its winning streak to seven games by defeating the Boston Braves 8 to 3. Paul Waner and Grantham got seven hits and scored five runs between them.

The New York Yankees rode over the Cleveland Indians for the second double-header in a row. Babe Ruth hit his 35th home run in the first game and George Pipgras pitched a good game for the winners in the nightcap. The scores were 7 to 3 and 6 to 2.

The St. Louis Cardinals finally defeated Brooklyn after Manager Wilbert Robinson had sent in his third pitcher. St. Louis put across a run in the ninth inning and won, 7 to 6.

HILLER-LINNMANN IN A 72-HOLE GOLF MATCH AT THE B. C. C.

HILLER TAKES LEAD IN FIRST 18 HOLES SUNDAY; SHOOT PAR ON SECOND ROUND

JOHNNY LINNMANN, LAST YEAR'S CHAMPION DRIVES 285 YARDS ON NO. 7

W. R. Hiller shot par golf in the second round Sunday to take the lead in the opening rounds of the 72 hole individual tournament with Johnny Linnemann to be continued over week ends at the Brainerd Country club course.

Hiller who has been on the verge of beating old man par most of the season went great guns on his second round by matching figures with the old gentleman, shooting a perfect 36 with a 38 on his first round for a total of 74 for the 18 holes. Linnemann's medal for the 18 was 37-39, total 76.

Both players were hitting them long and straight, Johnny getting a 285 yard drive on No. 7 in the first round. Wray's putting gave

him the extra two stroke lead. The next 54 holes are being watched with much interest.

Hiller is competing today in the State Golf Tournament at Bemidji. Linnemann is last year's club champion and is taking this means of conditioning himself for the coming Country club tournaments.

WHAT OUTSTANDING STARS DID YESTERDAY

(By United Press)

Babe Ruth—Hit his 35th home run of the season in the first game. Failed to get a hit in the second game, but scored a run.

Lou Gehrig—Singled once in three times up in first game. Failed to hit in second.

Paul Waner—Had a perfect day at bat, getting a triple and two singles.

Hack Wilson—Failed to hit in four attempts.

Harry Heilmann—Got two singles in four times at bat in first game. Failed to hit in second game.

Rogers Hornsby—Singled once in three times at bat.

Frank Frisch—Got a double in two attempts.

Ty Cobb—Hit one double in four times at bat in the first game and did not play in second.

The Boss of One Cardinal Farm

By QUIN HALL.

RECALLING the world's series of 1926, you will doubtless remember that the fellow who led the St. Louis Cardinals in hitting during that series, for the total of seven games, was Bill Southworth, an outfielder.

Right now Southworth is managing the Rochester club in the International League, and every once in a while—in fact, pretty often—you'll find his name listed in the line-up, and he still likes to romp around the outer gardens.

Rochester is a part of the "farm system" of the St. Louis Cardinals, and ex-Cardinals are promoted to the management of the various units comprising the "system" in appreciation of faithful service with the Red Birds.

Southworth, who was with the New York Giants prior to becoming a Cardinal in the midst of the 1926 season, hit the apple in the 320 class during that season, and last year he clubbed out an average of .300, showing that he is no slouch when it comes to taking his turn at the platter.

Rochester, under the tutelage

of Southworth, is putting up a hot fight for leadership in the International League this season and it would not be at all surprising to see Bill land a pennant during his first season as a full-fledged pilot.

While there has been considerable criticism over the "farm system" it seems to be working out particularly well for the parties who are most concerned. Last year the St. Louis farm in the International League was located at Syracuse and while the Cardinals gave the home folks of Syracuse winning ball and a team which finished second to Buffalo, the attendance dropped almost to the point where they had more people on the playing field than they had in the bleachers when they were "at home," so last Fall the farm was put on rollers and moved over to Rochester.

This season, under Southworth, the team is again playing winning baseball and with a pennant in sight the Cardinals have a big field to draw from to plug up any weak spots which may materialize in the Rochester line-up.

Besides owning the Rochester

club, the St. Louis Cardinals also own the Houston club in the Texas League, the Topeka club in the Western Association and the Danville club in the Central League. The Cardinals also own the Dayton club of the recently organized Central League and the Laurel nine of the Cotton States League. So it can be seen that the St. Louis Nationals have plenty of farms with plenty of capable farm hands being given the early training which may lead to stardom.

While the initial outlay for such farms may be rather high, the management of the Cardinals figures that it is much cheaper to secure future talent in this manner than be forced to gamble with possible talent at exorbitant prices. The value of the system to the Cardinals is best expressed in the fact that the world's series champions of 1926 was a team largely composed of players who had seen service at various Red Bird farm stations. Hafev, Bottomley, Rhen, Douthitt, Bell, Thevenow, Holm, Mueller, Toporcer and Flowers were among the members of that team who were developed by the Cardinals.

LOUGHRAN STANDS OFF BARRAGE OF BLOWS OF LATZO

RETAINS LIGHT HEAVYWEIGHT TITLE LAST NIGHT

AT END OF 10 ROUNDS OF FURIOUS FIGHTING, LOUGHRAN GIVEN DECISION

TWICE WITHIN 7 WEEKS LATZO HAS TAKEN CRACK AT THE TITLE

Wilkesbarre, Pa., July 17.—(UP)—Once again Tommy Loughran has retained his light heavyweight title by a close margin.

In the heart of the "Black Diamond" coal district last night, Loughran stood off the almost constant barrage of blows by Pete Latzo, the courageous Slav. At the end of ten rounds of furious fighting, Loughran was awarded the decision.

Twice within seven weeks Latzo had made valiant but unsuccessful attempts to win the title from Loughran.

Each time Latzo lost, but his margin of defeat was never decisive. Last night, almost always on top of Loughran, failing away with both fists, Latzo kept him moving backward most of the time.

The former Scranton miner started slowly, losing the first three rounds. But in the fourth, he almost drove the champion out of the ring with a brilliant burst of fighting which raised the crowd of 15,000 howling fans to their feet.

Loughran, however, finally worked hte miner out of the corner and in a short time was back with the stabbing fists which carried him to the throne.

RISKO AND SQUIRES TAPER OFF FOR BOUT

Detroit, July 17.—(UP)—Johnny Risko, Cleveland, and Johnny Squires, South African heavyweight, will taper off, beginning today, for their ten-round bout here Thursday night. Jack Dempsey, former heavyweight champion, is expected in Chicago Wednesday on his way here to act as referee of the bout.

FIDEL LA BARBA TO BOX EVANS

Los Angeles, July 17.—(UP)—Fidel La Barba, retired undefeated flyweight champion, will have a two or three pound weight advantage over Huerta Evans when they meet here tonight in La Barba's comeback attempt.

Evans weighed 118 pounds and La Barba was expected to tip the scales at 121.

Badger Coach Organizes Amateur Baseball Teams

Promoting amateur baseball in Wisconsin is the latest job assigned to Coach Leonard B. Allison, assistant athletic director at the University of Wisconsin, who has been appointed state athletic officer for the American Legion.

Allison was recommended for the post by Maj. John Griffith, commissioner of the western conference, who knew of his work in a similar position while at South Dakota State university. "Stub" as the Badger coach is better known, is making preliminary plans for a Wisconsin state baseball league.

Critz Hits Timely

Hughey Critz (shown in the photograph) has been hitting timely and fielding brilliantly for the Cincinnati Reds this season. The Cincinnati second baseman is one of the best in the league. Had he been going as well last summer the race might have ended differently.

Famous Diamond

The word "Kohinoor" is Persian for mountain of light. The diamond which bears this name is said to have weighed 793 carats originally. It is one of the crown jewels of Great Britain and its present weight is 106 1-16 carats.

FREAK SHOT CLUB IS NOW REIGNING

List of Eligibles Presented in American Golfer.

Now that holes-in-one have been made on every year-old course in the land, the journalistic gentlemen who follow the game are digging up eligibles for a more exclusive mythical fraternity, the Freak Shot club.

All you need to become a member are the proper circumstances—and a ton of luck. If you happen to play your ball from its lie in a bird's nest plop into the hole, or if your hopeless hook ricochets from a tree and becomes a hole-in-one, you're in. And you are in good company, as witness this list of eligibles presented in the American golfer.

Willie MacFarlane got in through a barn door—two barn doors, in fact. He was playing against Harry Hampton at the Aberdeen (Scotland) club. They were fighting hole for hole when Willie sliced a drive terrifically. It pulled up near a barn, far off the fairway. But Willie, opening the barn door, found a second door exactly opposite and the hole on a line 200 yards away. He had to hit a hard drive, measured in inches to get through both doors. But he did it, stopping his ball within six feet of the hole.

Joe Demoss, former Wisconsin State champion, was matched with Warren K. Wood at Green Lake, Wis., when his drive from the eighteenth tee came down on top of a flat awning near the clubhouse. Demoss mounted the awning and, teetering precariously, slapped a beautiful brassie shot for the hole, ending a short chip-shot away.

Aubrey Boomer was as surprised as his gallery at the play that took him into the Freak Shot club. The English star was playing a Lancashire tournament, when his drive landed in front of a two-foot bank over which he had to play. Using his spoon, he gave the ball a vicious cut. But instead of arching through the air the ball disappeared completely. After a mystified search, Boomer incredulously drew the ball from his pocket. It had struck the soft earth at the top of the bank, rebounded and hidden itself while he still had his arms extended in completing the swing. And what do the rules say about that one?

In the 1926 Canadian Open at Montreal, Leo Diegel, then the titleholder, found himself looking hopelessly on the long eleventh hole in the practice rounds, says the American Golfer article. His one hope to escape the jinx, he concluded, was to drive toward the twelfth fairway, which ran parallel on the right, and let'er hook. Twice he did it in the regular play, and both times the hooks described a perfect semicircle—but landed 350 yards away and in the center of the eleventh fairway.

Olympic Coach Schulte Never on Cinder Path

Track Coach Henry F. (Indian) Schulte of the University of Nebraska, selected as one of the mentors of the 1928 United States Olympic team, never performed on the cinder path.

To his coaching credit, however, are many past Olympic performers and 1928 potential representatives.

There was the great Robert Simpson, who revolutionized hurdling and set world marks which only recently have been bettered. Jackson Scholz, speed marvel for more than a decade and still among the select, learned the art of sprinting under Schulte's direction. And now there are Roland Locke, holder of the world's furthest record of 20.5 seconds, and Falt Elkins, American decathlon champion and record holder.

PEACE, QUIET NOW REIGNS ON STEAMER

MARKS SET BY DECATHLON STAR IN SPECIAL TRYOUT SUNDAY

SWIMMING COACHES HOPE FOR CLEAN SWEEP AT MEET AT AMSTERDAM

By FRANK GETTY

(United Press Staff Correspondent)

Aboard S. S. President Roosevelt, July 17.—With Falt Elkins definitely barred from the American Olympic team, peace and quiet reigns on the President Roosevelt as it steams closer to Amsterdam and the Olympic piad.

Maj. Gen. Douglas MacArthur, president of the Olympic committee, ruled Elkins out after considering the marks set by the decathlon star in a special tryout at New York on Sunday.

Elkins was one of the athletes whom the New York Athletic club offered to send to Amsterdam after the man had failed to make the Olympic team.

Dernell Every, Yale fencer, suffered a flesh wound in the shoulder when his opponent's foil broke during a work-out. It was feared at first that the injury might hinder his chances in the Olympics, but thorough examination disclosed that it was more or less superficial. It was hoped that Every would be able to resume practice today or tomorrow.

Leslie Biers, wrestler, is nursing an injured shoulder but is expected to be all right soon.

At a meeting of all team coaches, it was agreed that the athletes aside from the casualties are in excellent condition.

Swimming coaches are exceedingly confident, and hope for a clean sweep at the Olympic games. The rowers also are believed by coaches to have a good chance for a clean-up in their seven events.

Dorothy Dayton, of Pasadena, Cal., the youngest member of the team, celebrated her 13th birthday today.

HEENEY TO GIVE UP HIS NIGHT WORKOUTS REGIME

Fair Haven, N. J., July 17.—(UP)—Tom Heenev has decided to give up his night workouts and from now on will do most of his training in the afternoon.

The challenger for Gene Tunney's title weighs 202 pounds and is anxious to take off about eight of them before crawling into the ring to meet Tunney on July 26.

Customer—Have you a book on salesmanship?
Book Clerk—Yeah—(yawn)—we've got one. Look around and maybe you'll see it. I haven't read it myself.

Customer—I should say you haven't.

Proper Securities
"Jones wants to borrow five dollars from me. Is he good for that amount?"

"Yes, with proper securities."
"What would you suggest?"

"A chain and padlock, a pair of handcuffs, and a watchdog."

The Candid Poet
The guests had thoroughly enjoyed the evening of recitations by a local poet. He was the last to depart. The hostess wrung his hand and said: "Poets are born—"

"And," he interrupted, "not paid."

PRESENTED AT COURT

"He says he's been presented at court."
"I'll say he has—twice for embezzlement and forgery once."

Built Like a Derrick
An elephant is capable of lifting about 600 pounds with its trunk.

Watching the Scoreboard

(By United Press)

Yesterday's Hero—Kiki Cuyler who hit a home run and two singles, enabling the Chicago Cubs to win their seventh straight game.

The Chicago White Sox continued their dash up the American league ladder by winning two games from the Boston Red Sox, 4 to 0 and 9 to 1. Faber and Blakenship turned in two well-pitched games, each allowing Boston only seven hits.

The St. Louis Browns went ten innings to take their third straight game from Washington 4 to 2. It was Crowder's eleventh victory of the season.

Pittsburgh stretched its winning streak to seven games by defeating the Boston Braves 8 to 3. Paul Warner and Grantham got seven hits and scored five runs between them.

The New York Yankees rode over the Cleveland Indians for the second double-header in a row. Babe Ruth hit his 35th home run in the first game and George Piggas pitched a good game for the winners in the nightcap. The scores were 7 to 3 and 6 to 2.

The St. Louis Cardinals finally defeated Brooklyn after Manager Wilbert Robinson had sent in his third pitcher. St. Louis put across a run in the ninth inning and won, 7 to 6.

HILLER-LINNEMANN IN A 72-HOLE GOLF MATCH AT THE B. C. C.

HILLER TAKES LEAD IN FIRST 18 HOLES SUNDAY; SHOOT PAR ON SECOND ROUND

JOHNNY LINNEMANN, LAST YEAR'S CHAMPION DRIVES 285 YARDS ON NO. 7

W. R. Hiller shot par golf in the second round Sunday to take the lead in the opening rounds of the 72 hole individual tournament with Johnny Linnemann to be continued over week ends at the Brainerd Country club course.

Hiller who has been on the verge of beating old man par most of the season went great guns on his second round by matching figures with the old gentleman, shooting a perfect 36 with a 38 on his first round for a total of 74 for the 18 holes. Linnemann's medal for the 18 was 37-39, total 76.

Both players were hitting them long and straight, Johnny getting a 285 yard drive on No. 7 in the first round. Wray's putting gave

him the extra two stroke lead. The next 54 holes are being watched with much interest.

Hiller is competing today in the State Golf Tournament at Bemidji. Linnemann is last year's club champion and is taking this means of conditioning himself for the coming Country club tournaments.

WHAT OUTSTANDING STARS DID YESTERDAY

(By United Press)

Babe Ruth—Hit his 35th home run of the season in the first game. Failed to get a hit in the second game, but scored a run.

Lou Gehrig—Singled once in three times up in first game. Failed to hit in second.

Paul Waner—Had a perfect day at bat, getting a triple and two singles.

Hack Wilson—Failed to hit in four attempts.

Harry Heilmann—Got two singles in four times at bat in first game. Failed to hit in second game.

Rogers Hornsby—Singled once in three times at bat.

Frank Frisch—Got a double in two attempts.

Ty Cobb—Hit one double in four times at bat in the first game and did not play in second.

The Boss of One Cardinal Farm

BILL SOUTHWORTH
FORMER CARDINAL, NOW PILOT OF TH' ROCHESTER CLUB IN TH' INTERNATIONAL LEAGUE—A CLUB WHICH IS PART OF TH' EXTENSIVE ST LOUIS FARM SYSTEM

By QUIN HALL

RECALLING the world's series of 1926, you will doubtless remember that the fellow who led the St. Louis Cardinals in hitting during that series for the total of seven games, was Bill Southworth, an outfielder.

Right now Southworth is managing the Rochester club in the International League, and every once in a while—in fact, pretty often—you'll find his name listed in the line-up, and he still likes to romp around the outer gardens.

Rochester is a part of the "farm system" of the St. Louis Cardinals, and ex-Cardinals are promoted to the management of the various units comprising the "system" in appreciation of faithful service with the Red Birds.

Southworth, who was with the New York Giants prior to becoming a Cardinal in the midst of the 1926 season, hit the apple in the 1926 class during that season, and last year he clubbed out an average of .300, showing that he is no slouch when it comes to taking his turn at the platter.

Rochester, under the tutelage of Southworth, is putting up a hot fight for leadership in the International League this season and it would not be at all surprising to see Bill land a pennant during his first season as a full-fledged pilot.

While there has been considerable criticism over the "farm system" it seems to be working out particularly well for all the parties who are most concerned. Last year the St. Louis farm in the International League was located at Syracuse and while the Cardinals gave the home folks of Syracuse winning ball and a team, the attendance dropped almost to the point where they had more people in the playing field than they had in the bleachers when they were "at home," so last fall the farm was put on rollers and moved over to Rochester.

This season, under Southworth, the team is again playing winning baseball and with a pennant in sight the Cardinals have a big field to draw from to plug up any weak spots which may materialize in the Rochester line-up.

Besides owning the Rochester club, the St. Louis Cardinals also own the Houston club in the Texas League, the Topeka club in the Western Association and the Danville club in the Central League. The Cardinals also own the Dayton club of the recently organized Central League and the Laurel nine of the Cotton States League. So it can be seen that the St. Louis Nationals have plenty of farms with plenty of capable farm hands being given the early training which may lead to stardom.

While the initial outlay for such farms may be rather high, the management of the Cardinals figures that it is much cheaper to secure future talent in this manner than be forced to gamble with possible talent at exorbitant prices. The value of the system to the Cardinals is best expressed in the fact that the world's series champions of 1926 was a team largely composed of players who had seen service at various Red Bird farm stations. Hafey, Bottomley, Klem, Douthit, Bell, Thevenow, Holm, Mueller, Toporcer and Flowers were among the members of that team who were developed by the Cards.

Saint Paul DO YOU KNOW?

Over \$700,000,000 worth of quality goods were produced by the manufacturers of Saint Paul during 1927. Goods shipped to the far corners of the world; to wherever buyers have learned that "Made in Saint Paul" is in itself an indication of finest workmanship.

Stunning Frock Is Made of Hand-Blocked Scarfs

Buying material for one's frock at the neckwear department is a novel experience which many women are enjoying this season. It came about in this way: Some ingenious designer evolved a stunning frock out of four hand-blocked silk scarfs. So successful was this costume it started a movement which is being taken up by women everywhere.

On Rearing Children from CRIB to COLLEGE

Compiled by the Editors of "CHILDREN,
The Magazine for PARENTS"

Every child should be assigned home duties at an early age so that he may feel a part of the family unit, sharing in its responsibilities.

The old-fashioned mother used to throw up her hands in despair and terror when it became clear that a tantrum was brewing and cry, "Oh, he's got Grandfather Jones' temper! I knew it would turn up somewhere. But nowadays Grandfather Jones' bad temper is no excuse. The nervous, excitable child is more readily subject to rage than the naturally placid youngster, of course. But the modern mother knows that training alone will help the child to master himself.

Even the milk of cow or mother may not have a liberal supply of vitamin C, and if sunlight is lacking or the food is not green and fresh, it may be inadequate. Then oranges and tomatoes supply the need. Egg yolk adds iron, phosphorus and vitamin A, for blood and body cells and for growth. Spinach, too, adds iron—the one element that the milk is a little short on—and all three vitamins, A, B, and C.

Salt shakers, with some pebbles inside, make most wonderful rattles for the baby; measuring cups are useful to bite on, and a tea-ball jangles entrancingly on the end of its chain. Sheets of crisp paper are interesting to shake and crumple, as are magazines, if baby is past the stage of putting everything into his mouth.

The recognition of rhythm is the first step in understanding and enjoying music. Let the tiny child living in the country sense the regular beat in the chirp of the crickets, the droning of locusts, the timed repetition of the meadow lark's call, the crunch crunch of wagon wheels, and the chugging of the motor boat engine. If you yourself have never noticed these things before, now is the time for you to begin, with him.

Or, if he lives in the city, you can make use of ticking clocks, footsteps on the pavement, church bells and automobile engines. You are expected to do nothing except feel the beat yourself, and nod, or clap, or tap the foot, or beat time, or pat his baby hand, or sway the body, expressing the pulsation in any way you prefer, and encouraging him to do the same. It is a game to be played whenever the mood is right for it.

A baby of nine months will jiggle up and down in his baby carriage in perfect time to a simple tune.

(© by Children, the Magazine for Parents.)

Long Silk Lace Mitts

Worn at Paris Races

Long mitts of silk lace which reach almost to the shoulder and look like long tight sleeves are offered by several dressmakers as a suggestion for the formal costumes worn at the Paris race courses on sunny gala days.

The mitts come several inches short of the shoulder and permit women who have acquired sunburn at beaches to display their brown arms without wearing sports costumes, which are taboo at smart afternoon events this summer.

The lace gloves are worn only with lace dresses and usually there is a sleeveless three-quarter-length lace coat with the costume.

Loyalty

For the man who is discouraged, downhearted by the rush of events, oppressed by petty failures, there is no stimulant like the compelling power of an intensive loyalty. Let the man who is not making good in his work dedicate himself to a new sense of allegiance to those with whom and for whom he labors, says the Longview News. Out of vigorous loyalty to his fellow workers and his employer will come the spirit of which success is forged. Let the man whose life seems dull and sordid find a loyalty—a loyalty to his home, perhaps, to his city, to his college, to his church—and life will be transformed for him as the gleam of purpose dispels the clouds of cynicism and mistrust. Out of loyalty to others will come that greater loyalty to self that transmutes a person into a personality, a slave into a servant, and a human into a man. Let us attain to a loyalty and hold fast to it.

Is it advanced age slipping over us, or is it an actual state of affairs, that makes us believe that there used to be more bluebirds than there are today? asks the Fort Wayne News-Sentinel. It's good to observe that there are still a good many bluebirds now—but we can't help wishing there were more. Nothing is more beautiful in all the kingdom of birds than the bluebird, whom John Burroughs described as having the tinge of heaven on his back and the tinge of earth on his breast. That seems to be the best spiritual description of this blithe herald of fairer days. Somebody has said that the sight of a bluebird "seems to make you glad for the beauties of earth and to make you think of a world fairer still." No wonder the bluebird has long served as the eternal and universal symbol of happiness among men. There must be bluebirds in heaven. It wouldn't be heaven without them.

Why not, speculates the Lafayette Journal and Courier, an adjustable heel for midday's slipper—one that can be inflated for evening, deflated for early morning and semi-blown up for afternoon or street use? A rubber heel filled with air ought to provide the resiliency and cushiony effect needed. Then, too, with balloon heels the reckless "stomper" of the dance floor might be forcefully reminded by an occasional blowout at the heel that the proprieties were being too enthusiastically "tromped" on. Dancers of the "black bottom" and the charleston would then be compelled to carry spares. The regular filling station service of the ballroom might easily be equipped to supply "free air." For that matter, each escort might carry a bicycle pump and siphon combined when going out among the high-heeleders.

The feelings of the man in the Belleville jail who discovered that he had served 90 days to which he was not sentenced may have been even more poignant than those of the man in Boston who paid alimony for three years before he found out that the divorce decree had ordered no alimony.

Archaeologists take film pictures of relics they unearth, telling a part of the story of vanished races, but the archaeologists of the future, poking around the ruins of our abandoned settlements, will find in carefully sealed receptacles film pictures telling a complete story of what we did and how we lived.

By alternating sleeping cars with airplanes the Pennsylvania railroad will carry passengers from New York to California in 48 hours. This will require only a small additional allowance of time for a most pleasurable and thrilling week-end trip.

A quarrel between the Chilean minister to Paraguay and a Peruvian military attaché is to be settled by a duel. Much as dueling is to be deplored, it may have its advantages in managing disputes without uprising among innocent bystanders.

When Thomas Edison reached Fort Myers for his forty-second winter in Florida he was met at the station by a brass band. It would have been more appropriate to have welcomed him with a phonograph.

It is confidently expected by aviation promoters that Charles Lindbergh will make a reliable business man, even though he takes no great interest in golf and after-dinner speeches.

It is stated that every day 2,000,000 citizens are ill. Taking into consideration the transient grippe epidemics, the estimate seems rather conservative.

There would be great saving to the popular purse if car fares could be reduced as easily as taxes.

Nothing is ever quite as you expected it to be. Often it is an improvement.

WHEN THE POT CALLS THE SKILLET BLACK

"Mexico's Lindy" Killed In Crash

Bravely Captain Emilio Carranza (inset) defied a lightning and thunder storm in leaving Roosevelt Field on his non-stop flight to Mexico City. But the elements were too much for him. He crashed in a berry patch near

Burlington, N. J., within a short time after his departure for home. The above picture shows all that remains of Mexico Universal, a sister ship of Lindbergh's Spirit of St. Louis.

(International Newsreel)

Red Cross Life Saving Methods

"OUT goes the bad air; in comes the good," these girls are saying as they practice the prone pressure method of resuscitation, taught by the American Red Cross. This method needs only "two good hands and a level head," and is the most effective and simplest method of reviving water victims. In the oval, the Red Cross life saving instructor is demonstrating the "cross-chest carry," taught life savers for bringing drowning people safely to shore.

DAIRY

DAIRY

TRAIN HERD SIRE FOR MAN'S SAFETY

The bull's disposition depends upon the man who handles and cares for him almost as much as it does upon the animal himself. A man who was looking for a herd sire remarked recently: "I wouldn't have a — bull," naming a very popular breed, "on my place. They are all too cross." At the time he was visiting a farm where the herd bull was a regular watchdog. As soon as a stranger was seen he would begin roaring and pretend to be very vicious. Yet that same bull when called by his caretaker would come 40 rods across his paddock and meekly put his nose over the gate or the stall door until the staff could be hooked into the ring and would follow his leader anywhere. His predecessor in that paddock did his very best to kill that same attendant on every possible occasion.

Why the difference? The answer is in one word, "care." The earlier bull was never handled. The latter was shown as a calf and was always handled. One purchaser at this same herd remarked: "The ease with which your bulls handle is worth \$100 to any man."

No one wishes a herd bull for a family pet and no one wants a bull with the disposition of a heifer. But, masculinity and viciousness are not necessarily simultaneous traits, writes H. E. Colby, in the Dairy Farmer.

Let the bull know that his caretaker is boss at all times. Let him have respect for authority but do not keep him in abject fear. Frequent grooming is one of the best means of taming him. Find the spot he enjoys having rubbed and scratch him there as often as possible. Usually, it is on the back or over the shoulders where his ponderous size will not permit him to reach. But do this with a good strong fence between you. When handling him always leave available a clear field for speedy retreat. If you must go into the stall with even the most tractable bull, keep your position such that you can back away quickly and safely. Never stand between him and a wall. Always handle the bull without fear, but with every precaution for safety. An animal will know by instinct if his caretaker is in fear of him, and that is the best method of encouraging viciousness.

The best time to begin training the herd bull, so as to influence his disposition, is when a calf. If he is handled from the time he drinks from a pail the process of taming will be much easier. A ring in the nose at a year of age also has a quieting tendency. That aids handling. Frequent grooming and, if there is an opportunity, a season or two in the show yard are the best possible insurance against ugliness.

Repellents Effective for Short Period Only

Fly repellents will keep flies off the cows for a short time after the repellent has been applied, but after the application has been made for an hour or two it is no longer effective. About the only good fly repellent will do is to quiet the cows while the milking is being done if the repellent is applied just before milking time.

There is very little difference in any of the repellents on the market. Practically all of them will be effective for several hours.

If you want to go to the trouble of mixing your own fly repellents you can do so. The Ohio experiment station recommends the following mixture: Two gallons creolin, one gallon cottonseed oil, ten gallons water. Mix and apply with a sprayer. The same station also recommends the following spray: ½ gallon crude carbolic acid, ½ gallon oil of tar; ½ gallon cottonseed oil. Mix and apply with a sprayer.

Dairy Hints

Have cows in good flesh.
Follow a regular schedule of daily work.

Treat cows gently and avoid exciting them.

Weigh the milk of each cow at each milking time.

Provide a comfortable box stall or suitable place for calving.

Regulate the amount of feed by the milk records and the individuality of the cow.

Let every dairyman remember that the dairy barn is the "kitchen" in which milk is made.

Join a cow testing association and other organizations that help one to practice up-to-date methods of managing a dairy herd.

Using milk pails with small tops and clipping the cows' udders and tails will help in keeping down the bacteria content of milk.

Begin using ice for the milk and cream that is held on the farm. If there is not an ice supply, pipe spring water to the tank in the milkhouse or where the milk is kept.

BUTTER QUALITY CAN BE IMPROVED

The delivery of good cream was never as important as it is today. Eastern markets have often discriminated in price as much as ten cents per pound between butter classing as firsts and that classing as seconds. A slight difference in the score of butter has often made a difference of three cents per pound in the price.

It is impossible to make good butter from poor cream. More attention must be given to the production of good cream on the farm.

Cooling of cream promptly has much to do with the quality. Warm cream should never be mixed with cold cream. It should be cooled before being mixed with other skimmings, otherwise bad flavors and poor quality will result. The best way to cool cream is to place it in cold water. Cream quickly cooled and held in cold water will keep in good condition. Cream should be immediately put in a small can when separated and kept in cold water. Stirring occasionally allows the animal heat to escape and improves the quality. Cream should be delivered to the creamery frequently in hot weather. If held more than three days it is apt to get moldy. Ship every other day if possible.

Every farm does not have a supply of cold water, but most farms do. A tank so situated that all water pumped for stock purposes runs through the cream tank will serve to keep cream cool. Many manufactured tanks are now on the market which can be purchased; likewise a common barrel may be made to serve the purpose very satisfactorily.

Build a cooling tank on your farm and you will produce less second-grade cream and thus raise the quality of butter.—Colorado State Dairy Commission.

Healthy Dairy Herds Are Always Most Profitable

In a preliminary survey of pure-bred herds in three localities, but one herd has been found free from the disease. This owner has been very particular about purchasing breeding stock. Bulls are bought only subject to abortion test as well as the tuberculin test. The value of clean herds is becoming thoroughly appreciated each year, and breeders of pure-bred cattle who believe their herds free from infection should attempt to confirm this suspicion by blood testing.

The advantages of clean herds are well known. First of all and most important, health herds are more profitable. Abortion disease control is thus a business proposition for every herd owner. Breeders who protect their customers against this infection by selling clean animals are building on a sound basis. On the other hand, prospective purchasers cannot afford to invest in pure-bred animals that harbor abortion infection.

Home-Raised Calves Are Best for Replacements

There are two principal reasons why most dairymen prefer to raise the cattle that are needed for their herd replacements. One is a question of economy and the other is that of disease control and elimination. Both are important considerations for practical dairymen.

Often when people depend upon purchasing the mature cows needed in their herds they find that they are forced to take cows that are not entirely desirable. Sometimes the cows are hard to milk, sometimes buyers find a bad quarter after the cow comes fresh and sometimes the cows are not as heavy milkers as expected.

Disease control is one of the hazards of dairying. This applies to contagious abortion as well as to tuberculosis. Present tests indicate that tuberculosis is more easily eradicated than abortion. When cattle are imported they should be purchased under a sixty-day retest for tuberculosis.

Dairy Notes

Be careful not to overfeed.

Provide plenty of pure, fresh water.

Keep cows comfortable and contented.

Feed cows sparingly the first few days after calving.

Cows should receive grain in proportion to production.

If you have ten or more dairy cows or are feeding beef cattle you need a silo. Silos pay for themselves quickly.

Be prepared to treat an attack of milk fever by having a clean sterilized pump to inflate udder with air.

Protect cows from heat and flies by giving them shade and keeping them in darkened stables during the heat of the day.

Successful operation of a milking machine depends largely on the operator. Occasionally there is dissatisfaction with a machine, due to difficulty encountered in meeting bacteria requirements in milk.

Stunning Frock Is Made of Hand-Blocked Scarfs

Buying material for one's frock at the neckwear department is a novel experience which many women are enjoying this season. It came about in this way: Some ingenious designer evolved a stunning frock out of four hand-blocked silk scarfs. So successful was this costume it started a movement which is being taken up by women everywhere.

On Rearing Children from CRIB to COLLEGE

Compiled by the Editors of "CHILDREN, The Magazine for PARENTS"

Every child should be assigned home duties at an early age so that he may feel a part of the family unit, sharing in its responsibilities.

The old-fashioned mother used to throw up her hands in despair and terror when it became clear that a tantrum was brewing and cry, "Oh, he's got Grandfather Jones' temper! I knew it would turn up somewhere. But nowadays Grandfather Jones' bad temper is no excuse. The nervous, excitable child is more readily subject to rage than the naturally placid youngster, of course. But the modern mother knows that training alone will help the child to master himself.

Even the milk of cow or mother may not have a liberal supply of vitamin C, and if sunlight is lacking or the food is not green and fresh, it may be inadequate. Then oranges and tomatoes supply the need. Egg yolk adds iron, phosphorus and vitamin A, for blood and body cells and for growth. Spinach, too, adds iron—the one element that the milk is a little short on—and all three vitamins, A, B, and C.

Salt shakers, with some pebbles inside, make most wonderful rattles for the baby; measuring cups are useful to bite on, and a tea-ball jingles entrancingly on the end of its chain. Sheets of crisp paper are interesting to shake and crumple, as are magazines, if baby is past the stage of putting everything into his mouth.

The recognition of rhythm is the first step in understanding and enjoying music. Let the tiny child living in the country sense the regular beat in the chirp of the crickets, the droning of locusts, the timed repetition of the meadow lark's call, the crunch crunch of wagon wheels, and the chugging of the motor boat engine. If you yourself have never noticed these things before, now is the time for you to begin, with him.

Or, if he lives in the city, you can make use of ticking clocks, footsteps on the pavement, church bells and automobile engines. You are expected to do nothing except feel the beat yourself, and nod, or clap, or tap the foot, or beat time, or pat his baby hand, or sway the body, expressing the pulsation in any way you prefer, and encouraging him to do the same. It is a game to be played whenever the mood is right for it.

A baby of nine months will jiggle up and down in his baby carriage in perfect time to a simple tune.

Long Silk Lace Mitts Worn at Paris Races

Long mitts of silk lace which reach almost to the shoulder and look like long tight sleeves are offered by several dressmakers as a suggestion for the formal costumes worn at the Paris race courses on sunny gala days.

The mitts come several inches short of the shoulder and permit women who have acquired sunburn at beaches to display their brown arms without wearing sports costumes, which are taboo at smart afternoon events this summer.

The lace gloves are worn only with lace dresses and usually there is a sleeveless three-quarter-length lace coat with the costume.

Loyalty

For the man who is discouraged, downhearted by the rush of events, oppressed by petty failures, there is no stimulant like the compelling power of an intensive loyalty. Let the man who is not making good in his work dedicate himself to a new sense of allegiance to those with whom and for whom he labors, says the Longview News. Out of vigorous loyalty to his fellow workers and his employer will come the spirit of which success is forged. Let the man whose life seems dull and sordid find a loyalty—a loyalty to his home, perhaps, to his city, to his college, to his church—and life will be transformed for him as the gleam of purpose dispels the clouds of cynicism and mistrust. Out of loyalty to others will come that greater loyalty to self that transmutes a person into a personality, a slave into a servant, and a human into a man. Let us attain to a loyalty and hold fast to it.

Is it advanced age slipping over us, or is it an actual state of affairs, that makes us believe that there used to be more bluebirds than there are today? asks the Fort Wayne News-Sentinel. It's good to observe that there are still a good many bluebirds now—but we can't help wishing there were more. Nothing is more beautiful in all the kingdom of birds than the bluebird, whom John Burroughs described as having the tinge of heaven on his back and the tinge of earth on his breast. That seems to be the best spiritual description of this blithe herald of fairer days. Somebody has said that the sight of a bluebird "seems to make you glad for the beauties of earth and to make you think of a world fairer still." No wonder the bluebird has long served as the eternal and universal symbol of happiness among men. There must be bluebirds in heaven. It wouldn't be heaven without them.

Why not, speculates the Lafayette Journal and Courier, an adjustable heel for milady's slipper—one that can be inflated for evening, deflated for early morning and semi-blown up for afternoon or street use? A rubber heel filled with air ought to provide the resiliency and cushiony effect needed. Then, too, with balloon heels the reckless "stomper" of the dance floor might be forcefully reminded by an occasional blowout at the heel that the proprieties were being too enthusiastically "trotted" on. Dancers of the "black bottom" and the Charleston would then be compelled to carry spares. The regular filling station service of the ballroom might easily be equipped to supply "free air." For that matter, each escort might carry a bicycle pump and siphon combined when going out among the high-heeleders.

The feelings of the man in the Belleville jail who discovered that he had served 90 days to which he was not sentenced may have been even more poignant than those of the man in Boston who paid alimony for three years before he found out that the divorce decree had ordered no alimony.

Archeologists take film pictures of relics they unearth, telling a part of the story of vanished races, but the archeologists of the future, poking around the ruins of our abandoned settlements, will find in carefully sealed receptacles film pictures telling a complete story of what we did and how we lived.

By alternating sleeping cars with airplanes the Pennsylvania railroad will carry passengers from New York to California in 48 hours. This will require only a small additional allowance of time for a most pleasurable and thrilling week-end trip.

A quarrel between the Chilean minister to Paraguay and a Peruvian military attaché is to be settled by a duel. Much as dueling is to be deplored, it may have its advantages in managing disputes without uprising among innocent bystanders.

When Thomas Edison reached Fort Myers for his forty-second winter in Florida he was met at the station by a brass band. It would have been more appropriate to have welcomed him with a phonograph.

It is confidently expected by aviation promoters that Charles Lindbergh will make a reliable business man, even though he takes no great interest in golf and after-dinner speeches.

It is stated that every day 2,000,000 citizens are ill. Taking into consideration the transient gripe epidemics, the estimate seems rather conservative.

There would be great saving to the popular purse if far fares could be reduced as easily as taxes.

Nothing is ever quite as you expected it to be. Often it is an improvement.

WHEN THE POT CALLS THE SKILLET BLACK

"Mexico's Lindy" Killed In Crash

Bravely Captain Emilio Carranza (inset) defied a lightning and thunder storm in leaving Roosevelt Field on his non-stop flight to Mexico City. But the elements were too much for him. He crashed in a berry patch near

Burlington, N. J., within a short time after his departure for home. The above picture shows all that remains of Mexico Universal, a sister ship of Lindbergh's Spirit of St. Louis.

(International Newsreel)

Red Cross Life Saving Methods

"OUT goes the bad air; in comes the good," these girls are saying as they practice the prone pressure method of resuscitation, taught by the American Red Cross. This method needs only "two good hands and a level head," and is the most effective and simplest method of reviving water victims. In the oval, the Red Cross life saving instructor is demonstrating the "cross-chest carry," taught life savers for bringing drowning people safely to shore.

DAIRY DAIRY

TRAIN HERD SIRE FOR MAN'S SAFETY

The bull's disposition depends upon the man who handles and cares for him almost as much as it does upon the animal himself. A man who was looking for a herd sire remarked recently: "I wouldn't have a — bull," naming a very popular breed, "on my place. They are all too cross." At the time he was visiting a farm where the herd bull was a regular watchdog. As soon as a stranger was seen he would begin roaring and pretend to be very vicious. Yet that same bull when called by his caretaker would come 40 rods across his paddock and meekly put his nose over the gate or the stall door until the staff could be hooked into the ring and would follow his leader anywhere. His predecessor in that paddock did his very best to kill that same attendant on every possible occasion.

Why the difference? The answer is in one word, "care." The earlier bull was never handled. The latter was shown as a calf and was always handled. One purchaser at this same herd remarked: "The ease with which your bulls handle is worth \$100 to any man."

No one wishes a herd bull for a family pet and no one wants a bull with the disposition of a heifer. But, masculinity and viciousness are not necessarily simultaneous traits, writes H. E. Colby, in the Dairy Farmer.

Let the bull know that his caretaker is boss at all times. Let him have respect for authority but do not keep him in abject fear. Frequent grooming is one of the best means of taming him. Find the spot he enjoys having rubbed and scratch him there as often as possible. Usually, it is on the back or over the shoulders where his ponderous size will not permit him to reach. But do this with a good strong fence between you. When handling him always leave available a clear field for speedy retreat. If you must go into the stall with even the most tractable bull, keep your position such that you can back away quickly and safely. Never stand between him and a wall. Always handle the bull without fear, but with every precaution for safety. An animal will know by instinct if his caretaker is in fear of him, and that is the best method of encouraging viciousness.

The best time to begin training the herd bull, so as to influence his disposition, is when a calf. If he is handled from the time he drinks from a pail the process of taming will be much easier. A ring in the nose at a year of age also has a quieting tendency. That aids handling. Successful operation of a milking machine depends largely on the operator. Occasionally there is dissatisfaction with a machine, due to difficulty encountered in meeting bacteria requirements in milk.

SEARCH PARTY FINDS LOST MAN IN WOODS

Hans Knudson, 75. Located Three Miles Up River by Search Party of 50

LOST SUNDAY AFTERNOON

Exhausted Man Unable to Speak Was Carried to Car and Brought To His Home

Unable to speak, paralyzed from fear, and exhausted from hunger, Hans Knudson, 75, resident at 515 10th avenue N. E., lost Sunday afternoon in the woods to the north of Brainerd while on a blueberry picking expedition with his daughter, was found at 6:30 p. m. yesterday by searchers lying on the bank of the Mississippi river three miles from the city.

A party of 50, police officers, sheriff's department men, firemen, forestry department men, and citizens aided in the search. They walked a distance of three miles along the river until the man was located.

Knudson was carried to the road a few miles from where he was found and taken to Brainerd. His condition is reported improved. During the time he was lost he was without food. Exhaustion overcame him and unable to walk he dragged himself down to the river to drink. He was unable to rise to his feet and was found there by the search party.

Mr. Knudson became lost Sunday afternoon when he strolled off into the woods to find his daughter whom he believed lost but had started for the car. The two were picking berries in the vicinity of Whiteley creek.

The search party covered a distance of a quarter of a mile on the east side of the river, walking abreast and searching the underbrush.

When found Mr. Knudson had his shoes off and was suffering from exposure, mosquito and bug bites.

WABEDO

The farmers club enjoyed the program Friday which was put on by some of the Pine River folks.

Everything at the Geo. Kline sale sold good the other day.

Harry Zaske helped at the Johnson saw mill last week.

Claude Whitted drove up a car from Brainerd last Monday for Mr. McCollister.

Mrs. Dud Robideau of Pine River visited a few days last week with Mrs. J. E. Shau.

Mrs. Geo. Ruscoe entertained her daughter, Mrs. Mack McCarty and family of Minneapolis one day last week.

Pine River shoppers last week were Will Shepard and family, Chas. H. Van Giffen, Harry Zaske and family, Art Breeden, wife and baby, Pete Allen, Mr. and Mrs. S. Whitted, Rex Saxton.

Gust Bleisner is using Ralph Felton's team while he is putting up hay.

Jim Shepard moved his family 12 miles the other side of Bagley Sunday, where he has worked for several months.

Farms and Stomachs

The food market, to which most energy is directed, is definitely limited by the stomach's capacity.—Farm and Fireside.

BOARD CONSIDERS NEW H. S. PLANS

"Gym" Planned to Seat 3,000 for Community Gatherings

ARCHITECTS PLANS CONSIDERED

Board Members to Have Blue Prints for Inspection in Few Days

The Brainerd Board of Education held a special meeting Friday at 4:30 p. m. for the purpose of considering the preliminary scheme for the erection of the new high school building as submitted by architects, Croft and Boerner. The board considered the plan until 6 p. m. when they recessed until 8 p. m. The consideration lasted until 11 p. m. when the meeting was adjourned with no definite action being taken or any motion made although the scheme as proposed by Croft and Boerner met with the general approval of all of the board present. F. M. Hagberg was the only absentee.

A few changes were suggested by the board relative to the seating capacity in the gymnasium rooms so as to seat more people. The auditorium is planned to seat 1,000 people. The plans also include "gyms" for both boys and girls, separated by a removable partition that can be removed to increase the seating capacity for the important games. The seating capacity for the "gym" will be about 1,500. Plans are also made that if a still larger capacity is needed for community gatherings removable folding chairs can be placed on the "gym" floor to increase the capacity to 3,000 seats.

Within the next week or ten days the corrected blue prints will be in the hands of the board members and interested parties can obtain copies from the board members to look over.

The new building will face Oak street and will cover practically an entire block. It will be fireproof in every respect and will be constructed to house 1,000 pupils comfortably.

There has been some question as to the delay in the construction of the new building but few realize that it will take from two to two and a half months to perfect the plans and specifications for the new building. The general contractor who receives the contract for the construction of the new building will tear down the old building and they can use any of the old material as they need it. There will also be the advantage of only having to handle the material once where if it was torn down now it might be necessary to handle it two or three times. As the new building will be much larger and will face on Oak street the foundation of the old building can not be used.

JAIL LAKE

John Norman was out this way this week buying cattle.

Nels Anderson was a shopper in Pine River Friday.

George Sweet is working for Ralph Duncan.

Tom Powers and family spent Sunday afternoon at Jenkins visiting.

Mr. and Mrs. Wm. Huffman of Longville are spending the week with their son-in-law and daughter, Mr. and Mrs. Glenn Glover and family.

Mr. and Mrs. Leon Glover and mother went to the sale at George Klines.

Ole Farde visited at the Leon Glover home Sunday evening.

Fred Sweet spent Sunday at the home of his parents, Mr. and Mrs. Dick Sweet.

C. J. Johnson began sawing at the mill last week.

ASSEMBLY SERVICES CONTINUE

Mr. and Mrs. Marvin Miller to Remain and Assist at Full Gospel Assembly

Evangelistic services at the Full Gospel Assembly continue this week with Mr. and Mrs. Marvin Miller assisting in the meetings. The two had planned to start a campaign at Bismarck, N. D., this week but have since decided to remain here one week longer.

Shop meetings are being held at noon with street meetings at 7 o'clock. Evangelistic services are conducted at 7:45 p. m. at the Full Gospel Assembly.

Rev. Herman Johnson, of Minot, N. D., is expected to speak tonight.

ANNUAL SUMMER BIBLE CONFERENCE

Northern Gospel Mission Camp to be Held at Mildred, July 26 to August 5

MEETINGS ARE PLANNED

Missionaries to Columbia, South America; Morocco, Western Soudan to Speak

Announcement was made today of the Eighth Annual Summer Camp Bible Conference of the Northern Gospel Mission, July 26 to August 5, inclusive, to be held at Mildred, Minn.

The meetings will be in a tent with the guests housed in buildings in the village. Meals will be served on the grounds and a general invitation is extended to the public. Expenses are cared for on the free offering plan but no collections are taken.

Three services will be held daily, the forenoon for prayer at 9:30 o'clock except Sunday, the afternoons at 3 o'clock except the first two days. Evening services will start at 8:15 o'clock. Reports of workers of the Mission which now has ten centers in the north with a number of preaching points at each center will be received.

A number of speakers are expected including Rev. C. P. Chapman, missionary from Colombia, South America, Rev. George C. Reed, of the Western Soudan, Africa, and Rev. F. C. Enyart, of Morocco, North Africa, all men of long experience in the work.

The Teaberry Taste Will Tell You

When you see the Teaberry pink package on dealers' counters let it be to you the sign of pure enjoyment. The tasty Teaberry flavor is different; it is better. Until you try it you will never know how good Chewing Gum can be.

The Teaberry pink package awaits you now at all stores.

REPAIR STORM DAMAGE

Committee to Urge Early Standardization of Fire Hose Couplings

Reports on streets, sewer work, repairs necessary following the recent heavy storms, and improvements for safety in traffic occupied a major share of the city council's session last evening.

After some discussion as to the advisability of starting the work at this time considering the watery condition of the ground, City Engineer R. T. Campbell was instructed to prepare an estimate of the cost of construction of a sewer on 13th street starting at Rosewood street and continuing south for three blocks. An estimate was also ordered for the installation of a sewer on Terrace avenue.

The city engineer reported that damage done to streets throughout the city by the storms was being repaired. Work on repairing the condition at A street and 13th street was to be started Tuesday, the engineer reported.

Authorization was given to repair the bridge on Northeast Ninth street by placing in a new floor and railing, also to repair the 12th street bridge.

To remedy the situation at the Brainerd ball park where recent games have been forced to be postponed on account of wet grounds, the council ordered the repairing of the sewer there.

Reported unsanitary conditions existing near the Finnish hall by permitting water to stand and weeds to grow were referred to the city health department and the police committee with power to act.

Alderman Martin Anderson reported the securing of eight carloads of cinders from the Northern Pacific railway company for use by the city in improving Cemetery Hill. The cinders will be placed on the hill this week.

The request of the G. and E. Tire Shop for permission to install an air stand in front of their shop at 506 Laurel street was denied when it was explained that the stand would be too close to a hydrant.

2 ARMY OFFICERS, 2 CIVILIANS MEET DEATH IN MEXICO

Mexico City, July 17.—(UP)—Two army officers and two civilians were executed after courtmartial for selling arms to Rebels, a San Louis Potosi dispatch to the Newspaper Universal said today. Many civilians had been arrested on similar charges, it was said.

A dispatch to the newspaper from Ciudad Maneul Doblado, in Guanajuato state, said that 54 Rebels had been killed in seven fights during the last month. In the largest fight, 200 Rebels under the famous leader, El Catorce, were engaged against Federal soldiers. Twenty-three Rebels were killed. In the other fights, bands of from 25 to 80 Rebels participated.

The application of R. C. Falconer for two gasoline pump licenses at 102 Laurel street at the location of Tourist Haven was granted.

The Brainerd Service Motor Company, 510 Front street was granted a license to operate a curb pump.

On motion, President W. J. Lyons was empowered to appoint a committee to interview the water and light board with respect to action on the standardization of fire couplings in the city of Brainerd. Mr. Lyons named Aldermen Martin Anderson, W. J. Hall and Chris Elvig on the committee.

SEARCH PARTY FINDS LOST MAN IN WOODS

Hans Knudson, 75. Located Three Miles Up River by Search Party of 50

LOST SUNDAY AFTERNOON

Exhausted Man Unable to Speak Was Carried to Car and Brought To His Home

Unable to speak, paralyzed from fear, and exhausted from hunger, Hans Knudson, 75, resident at 515 10th avenue N. E., lost Sunday afternoon in the woods to the north of Brainerd while on a blueberry picking expedition with his daughter, was found at 6:30 p. m. yesterday by searchers lying on the bank of the Mississippi river three miles from the city.

A party of 50, police officers, sheriff's department men, firemen, forestry department men, and citizens aided in the search. They walked a distance of three miles along the river until the man was located.

Knudson was carried to the road a few miles from where he was found and taken to Brainerd. His condition is reported improved. During the time he was lost he was without food. Exhaustion overcame him and unable to walk he dragged himself down to the river to drink. He was unable to rise to his feet and was found there by the search party.

Mr. Knudson became lost Sunday afternoon when he strolled off into the woods to find his daughter whom he believed lost but had started for the car. The two were picking berries in the vicinity of Whiteley creek.

The search party covered a distance of a quarter of a mile on the east side of the river, walking abreast and searching the underbrush.

When found Mr. Knudson had his shoes off and was suffering from exposure, mosquito and bug bites.

WABEDO

The farmers club enjoyed the program Friday which was put on by some of the Pine River folks.

Everything at the Geo. Kline sale sold good the other day.

Harry Zaske helped at the Johnson saw mill last week.

BOARD CONSIDERS NEW H. S. PLANS

"Gym" Planned to Seat 3,000 for Community Gatherings

ARCHITECTS PLANS CONSIDERED

Board Members to Have Blue Prints for Inspection in Few Days

The Brainerd Board of Education held a special meeting Friday at 4:30 p. m. for the purpose of considering the preliminary scheme for the erection of the new high school building as submitted by architects, Croft and Boerner. The board considered the plan until 8 p. m. when they recessed until 11 p. m. when the meeting was adjourned with no definite action being taken or any motion made although the scheme as proposed by Croft and Boerner met with the general approval of all of the board present. F. M. Hagberg was the only absentee.

A few changes were suggested by the board relative to the seating capacity in the gymnasium rooms so as to seat more people. The auditorium is planned to seat 1,000 people. The plans also include "gyms" for both boys and girls, separated by a removable partition that can be removed to increase the seating capacity for the important games. The seating capacity for the "gym" will be about 1,500. Plans are also made that if a still large capacity is needed for community gatherings, removable folding chairs can be placed on the "gym" floor to increase the capacity to 3,000 seats.

Within the next week or ten days the corrected blue prints will be in the hands of the board members and interested parties can obtain copies from the board members to look over.

The new building will face Oak street and will cover practically an entire block. It will be fireproof in every respect and will be constructed to house 1,000 pupils comfortably.

There has been some question as to the delay in the construction of the new building but few realize that it will take from two to two and a half months to perfect the plans and specifications for the new building. The general contractor who receives the contract for the construction of the new building will tear down the old building and they can use any of the old material as they need it. There will also be the advantage of only having to handle the material once where if it was torn down now it might be necessary to handle it two or three times. As the new building will be much larger and will face on Oak street the foundation of the old building can not be used.

JAIL LAKE

John Norman was out this way this week buying cattle.

Nels Anderson was a shopper in Pine River Friday.

George Sweet is working for Ralph Duncan.

Tom Powers and family spent Sunday afternoon at Jenkins visiting.

ASSEMBLY SERVICES CONTINUE

Mr. and Mrs. Marvin Miller to Remain and Assist at Full Gospel Assembly

Evangelistic services at the Full Gospel Assembly continue this week with Mr. and Mrs. Marvin Miller assisting in the meetings. The two had planned to start a campaign at Bismarck, N. D., this week but have since decided to remain here one week longer.

Shop meetings are being held at noon with street meetings at 7 o'clock. Evangelistic services are conducted at 7:45 p. m. at the Full Gospel Assembly.

Rev. Herman Johnson, of Minot, N. D., is expected to speak tonight.

ANNUAL SUMMER BIBLE CONFERENCE

Northern Gospel Mission Camp to be Held at Mildred, July 26 to August 5

MEETINGS ARE PLANNED

Missionaries to Columbia, South America; Morocco, Western Sudan to Speak

Announcement was made today of the Eighth Annual Summer Camp Bible Conference of the Northern Gospel Mission, July 26 to August 5, inclusive, to be held at Mildred, Minn.

The meetings will be in a tent with the guests housed in buildings in the village. Meals will be served on the grounds and a general invitation is extended to the public. Expenses are cared for on the free offering plan but no collections are taken.

Three services will be held daily, the forenoon for prayer at 9:30 o'clock except Sunday, the afternoons at 3 o'clock except the first two days. Evening services will start at 8:15 o'clock. Reports of workers of the Mission which now has ten centers in the north with a number of preaching points at each center will be received.

A number of speakers are expected including Rev. C. P. Chapman, missionary from Columbia, South America, Rev. George C. Reed, of the Western Sudan, Africa, and Rev. F. C. Enyart, of Morocco, North Africa, all men of long experience in the work.

TO ESTIMATE COST OF 13TH ST. SEWER

Council Contemplates Construction of New Pipe Line Starting at Rosewood

REPAIR STORM DAMAGE

Committee to Urge Early Standardization of Fire Hose Couplings

Reports on streets, sewer work, repairs necessary following the recent heavy storms, and improvements for safety in traffic occupied a major share of the city council's session last evening.

After some discussion as to the advisability of starting the work at this time considering the watery condition of the ground, City Engineer R. T. Campbell was instructed to prepare an estimate of the cost of construction of a sewer on 13th street starting at Rosewood street and continuing south for three blocks. An estimate was also ordered for the installation of a sewer on Terrace avenue.

The city engineer reported that damage done to streets throughout the city by the storms was being repaired. Work on repairing the condition at A street and 13th street was to be started Tuesday, the engineer reported.

Authorization was given to repair the bridge on Northeast Ninth street by placing in a new floor and railing, also to repair the 12th street bridge.

To remedy the situation at the Brainerd ball park where recent games have been forced to be postponed on account of wet grounds, the council ordered the repairing of the sewer there.

Reported unsanitary conditions existing near the Finnish hall by permitting water to stand and weeds to grow were referred to the city health department and the police committee with power to act.

Alderman Martin Anderson reported the securing of eight carloads of cinders from the Northern Pacific railway company for use by the city in improving Cemetery Hill. The cinders will be placed on the hill this week.

The request of the G. and E. Tire Shop for permission to install an air stand in front of their shop at 506 Laurel street was denied when it was explained that the stand would be too close to a hydrant.

The request of the Obrecht Stock Company to advance the date of their showing in Brainerd to the week starting Monday, August 6, was granted.

Edwin L. Anderson was given permission on motion to connect a house sewer to the main sewer at 1105 Norwood street.

A complaint was tendered by Alderman Holmstrom that boys were walking on the new splashboard recently erected for the protection of pedestrians from water slashed from cars on the Laurel street Mississippi river bridge. He suggested that signs be placed on the bridge warning the boys to refrain from attempting to walk the small surfaced board. He urged that action be taken to prevent injury. The matter will be taken up with the county highway department with regard to having signs placed.

The application of R. C. Falcener for two gasoline pump licenses at 102 Laurel street at the location of Tourist Haven was granted.

The Brainerd Service Motor Company, 510 Front street was granted a license to operate a curb pump.

On motion, President W. J. Lyons was empowered to appoint a committee to interview the water and light board with respect to action on the standardization of fire couplings in the city of Brainerd. Mr. Lyons named Aldermen Martin Anderson, W. J. Hall and Chris Elvig on the committee.

Love's Ecstasy

by May Christie

WHAT HAS HAPPENED SO FAR.

ALEDA RAY, pretty blue-eyed country girl, working in New York as a stenographer, is in love with Gary Chester, young engineer. She is living at the home of Marise de Rense, proprietor of the Harvest Moon cabaret. Marise, elderly and hardworking, is infatuated with Clive Mortimer, ne'er-do-well Englishman. The latter schemes, secretly, with Goldie de Rense, younger sister of Marise, to operate a private "post office" for blackmail. Marise faints upon learning the name of Alede's employer, W. B. Lingard. She warns Alede to leave his employ but does not explain why. That day, at the office, Alede sees Gary Chester drive off with the Countess Dellamanc, Lingard's niece.

NOW GO ON WITH THE STORY.

CHAPTER XXIII.
THE Countess Dellamanc was extremely bored.

In her Louis XIV bed in the smart Park Avenue hotel she awoke to a new day.

She yawned and stretched amid the perfumed linen sheets and lacy little pillows.

Oh! to lie here forever, dreaming happy dreams and never be awakened!

What was the good of rising and facing another day that, in its boredom, would be exactly like its predecessors? Life, despite her beauty, wealth, position, was stale, flat and unprofitable!

Thus mused the Countess Dellamanc, whom a number of people envied, but whom (so she assured herself, in her super-egotistical way) never had been "understood."

"I understand you only too well, cara mia," her handsome Italian husband, Count Mario, had said. (How he had maddened her!) "You are bored so with life because you are—what is the English word?—a monomaniac! You think—first, last and always—only of yourself!"

At that she had been furious. Lately, in the last stormy year in Rome, she had indeed been angered—and extremely disagreeable—most of the time.

She had lived so hard, and yet—despite her three marriages—achieved so little in the way of real happiness!

Her goals had fluctuated so. Beginning "life" at sixteen when she ran off from boarding-school with a member of the local noble family, she had learned—first, passion—and then, misery!

Her people had annulled that marriage, but not before the victim (the Countess Dellamanc always took the martyr's role, and never blamed herself for her own blun-

ders) had gained a first-hand and extremely sordid view of life. Some years later came her loveless, mercenary union with the rich broker, Schump.

Grown accustomed to his wealth, and having every whim gratified, the main idea of the lovely Inez was to maintain as great a distance as possible (metaphorically as well as literally) between the elderly husband and the young wife.

He was a bad sailor, so she went off frequently on yachting trips.

He was not musical, so she insisted on a box at the opera throughout the season, and amidst her galaxy of squires, the fat, homely "good provider" was not missed.

She cultivated society with a big "S." Despite her husband's wealth, it was an uphill climb. Inez's temper—never of the best at any time—was considerably impaired by social snubs.

She "flashed" about, however, beautifully roweled and jeweled. Her villa at Newport (the elite gave her many a rebuff!) was a dream of a place.

And wasn't her houseboat down in Florida a floating palace?

She went off on many trips to Europe, in pursuit of clothes and culture—Paris being the hub of the universe, she said, for a woman of her mind. She had periodical fits of declaiming American men as "boorish" . . . her remarks were sometimes quoted in the papers, and were not entirely kind.

Nor tactful. Nor was her behavior all it should have been, the busybodies said. Wasn't she cited as a resident in a divorce case that began in Vienna and ended in New York, and even though it was all a matter of spite—so went the lovely Mrs. Schump—and her name was withdrawn, and her husband (who was quite kind and

sympathetic in the matter) seen about again with her in public, "there is no smoke without fire," declared her critics, who were numerous.

Having married a man who was old enough to be her father, Mrs. Schump, however, soon drifted off on her own tack. While at Shepherd's Hotel in Cairo, she found a hectic and fabulously rich admirer in an Egyptian of high rank.

Her beau's latest wife, unfortunately (he had his own harem!) misunderstood the situation, and one moonlit evening followed the couple in one of her husband's cars out to the Pyramids, there quitting the machine and proceeded to pursue the pair, on camel-back, to the Sphinx.

The Arab guides informed the furiously jealous Oriental that the lovely American lady and her escort had departed—and a malignant smile seemed to decorate even the granite-hewn features of that notoriously inscrutable creature, the Sphinx!

The Egyptian wife rushed back to Mena House (which is not!) and found her truant spouse and Mrs. Schump imbibing champagne cocktails. She flung a knife—being an uncontrolled lover of the harem—and the "lover" as a souvenir bears, on her neck, a slight scar to this day.

Her embassy advised the well-known "flight out of Egypt" and when Mrs. Schump was out of the nursing-home she caught—at Alexandria—the next boat.

Back in New York, she found the patient Mr. Schump—since even a worm will turn, and one bad turn deserves another!—had become interested in little ladies of the chorus.

Ah! here was her chance to get (with enormous alimony!) a divorce!

But little pitchers have long ears. Mr. Schump was little, but his ears were not his prettiest feature, being protuberant, but they were long! And he had heard too much—about her "gigolos" in Paris and in Deauville—and last, but not least, the little "affaire" of the Egyptian.

He refused her request in plain and rather brutal language. There would be no divorce . . . no reconciliation . . . and he would cut off her allowance . . .

"What on earth am I to do?" sobbed Mrs. Schump.

(Continued Tomorrow)

PHOTOGRAPH SHOT ON HARDEST STEEL

Image Reproduced by the "Munroe Effect."

Washington.—Shooting a photograph into the hardest of chrome steel with the aid of high explosive nitrogelatin and so making a photographic record as permanent as the steel itself, is the feat that has been accomplished as a result of the "Munroe effect." This effect was the discovery of Dr. Charles E. Munroe, veteran explosive expert of the United States bureau of mines here. An incidental result of the work is proof that the blacks in a photograph print are due to varying thicknesses of finely divided silver, the thicker the deposit the darker the shadow in the photograph.

How Photograph Was Made.

The steel photograph was made recently by G. St. J. Perrot, superintendent of the bureau of mines experiment station at Pittsburgh and sent by him to Doctor Munroe. To make it a photograph of Doctor Munroe was laid on a piece of steel about two inches in diameter and an inch thick. On top of this was placed a disk-shaped piece of the nitrogelatin explosive, which was then fired. Though the paper photograph was completely destroyed, when the steel cooled sufficiently to be handled the profile of Doctor Munroe was found impressed on the surface. Where the photograph had been black, that is, in the shadows, the surface of the steel was raised, and where there had been lights the steel was incised.

Another example of the effect that is in Doctor Munroe's possession now was made by W. O. Snelling, director of research of the Trojan Powder company. In this case the words "Munroe Effect" were impressed into the surface of a block of the explosive, so that the letters were in intaglio. When this was exploded on a disk of the steel the letters appeared on it. However, they were also in intaglio on the steel. This is the opposite from what would be obtained with a die, for then the intaglio letters on the die would come out in relief on the finished product.

Doctor Munroe explains the effect by saying that when the detonation of the explosive occurs, the entire amount of the solid is converted to gas. This volume of gas, however, momentarily has the same size and shape as the original block of the explosive and is therefore extremely compressed. Where there was a cavity in the original explosive is the line of least resistance for the escape of the rapidly moving gas molecules. In seeking to escape they collide with each other, producing a vast number of tiny molecular drills, which bore into the hardest steel.

Blew Safe by Method.

Using the same principle, Doctor Munroe once blew a hole in a safe with a hollow cylinder of dynamite. He took a bundle of sticks of dynamite, then, by pushing a tin can through the center, he pushed out the center sticks and bound together the other ones so as to form a ring. This he exploded in a vertical position upon a safe. The result was a hole in the top of the safe corresponding to the hollow sticks. This hollow cylinder had acted as a gun to fire the gas molecules through the steel.

Any thin object, such as a leaf or photograph, can be reproduced on steel in this way, said Doctor Munroe, and so a permanent record can be obtained. The explosion has the effect of greatly magnifying slight differences in thickness such as between the layers of silver in the shadows and highlights of the photograph.

Hapsburg

Hapsburg, meaning "Owl's Castle," was a castle which stood in the canton of Aargau, Switzerland, the reputed cradle of the Hapsburg dynasty.

Minerals in Milk

Mineral constituents of milk that are especially important to the body are phosphorus, iron and lime.

MICKIE SAYS

COUNTRY MERCHANTS COMPLAIN THAT THE AUTO IS HAWKING TRADE AWAY FROM THE COUNTRY STORE, FORGETTING THAT THE SAME CAR WILL BRING FOLKS TO THE STORE IF THEY'RE JUST INVITED THROUGH THE COLUMNS OF THE HOME PAPER. ADVERTISING IN GASOLINE WILL RUN A CAR IN ANY DIRECTION! NEESS!

Tiny Locomotive

M. Melcher, a mechanic in France, has just completed a miniature locomotive which took him ten years to build. The completed engine is built to the exact scale of a standard engine and is said to be perfect in every detail. In order to get all of the details perfect much of the work had to be done under a microscope.

The Zealous Reformer

People give the names of zeal to their propensity to mischief and violence, though it is not the cause but their interest that influences them; they kindle and begin a war, not because it is just, but because it is a war.—Montaigne.

Alaska Not Included

The term "continental United States" is merely one of convenience, and does not include the noncontiguous territory of Alaska.

BRET HARTE HERO FOUND IN SWEDEN

Original of Arizona Peter Is Old and Blind.

Stockholm.—The original of Arizona Peter, Swedish hero of one of Bret Harte's stories, has been discovered by a Swedish newspaper to be still alive. He is living in the village of Smedjebacken in his native province.

The old Wild West hero is, however, totally blind. His real name is Per Erik Astroom, and he is now seventy years old.

Astroom left Sweden in the early '80s for the West, where he, like many other Swedes, entered the United States garrison service.

Arizona Peter earned a reputation for enterprise and daring. Once when he found a Sioux chief half unconscious, bound and gagged, he got off his horse and saved the Indian. The sweetheart of Astroom, however, was in Sweden, and, wishing to marry her, he got her a position at a neighboring farm, owned by a Scotch woman.

Shortly after her arrival she and her mistress were captured in their home by a plundering band and carried off. Accompanied by Grey Bear, Sioux chief, Astroom dashed across the Mexican border, surprised the brigands and rescued the women.

He then rode away and halted on the slope of a narrow canyon through which the robbers had to pass, as Bret Harte tells the story. There the Swede and the Indian shot down 50 of their foes.

One day Astroom struck a copper vein in the mountains, and soon a group of engineers and miners began to exploit the find. But his fiancée deserted him to marry one of the mining engineers.

In grief Astroom returned to Sweden, where he found work as a stone cutter. Through an explosion he lost the sight of both his eyes. Since then he has been a brushmaker.

Potato-Tomato Union Good Graft for Farms

St. Louis.—A "good graft" (not of the political variety) which anyone may try and which will reward a little patience with a double crop is described in a recent bulletin of the Missouri Botanical garden. It consists of a tomato vine grafted on a potato stock, which yields tomato fruits above and potato tubers below. The graft is fairly easy to make, it is stated, requiring no more skill than is needed for a similar operation on an apple twig. Apparently the first one on record was made over a century ago by an amateur scientist named De Tschudi, who reported his experiments to the Horticultural institute at Fromont, in France.

Neither partner in this double plant body seems to have any influence on the other. The tomatoes are like those of sister plants grown on their own roots, and the potatoes differ in no way from those grown in the ordinary way from other eyes cut from the same parent tuber.

Truth Requires Courage

"He who assumes leadership," said Hi Ho, the sage of Chinatown, "must be strong, indeed, if he tells the people his honest belief instead of what they wish to hear."—Washington Star.

The Baby Giraffe

At the time of its birth the giraffe measures six feet from its hoofs to the top of its head.

Babies Love It

For all stomach and intestinal troubles and disturbances due to teething, there is nothing better than a safe infants' and children's Laxative.

Mrs. Winslow's Syrup

For all stomach and intestinal troubles and disturbances due to teething, there is nothing better than a safe infants' and children's Laxative.

Old Folks Need a Mild Laxative - Not a "Physic"

Most men and women past fifty must give to the bowels some occasional help, else they suffer from constipation. One might as well refuse to aid weak eyes with glasses as to neglect a gentle aid to weak bowels.

Is your present laxative, in whatever form, promoting natural bowel "regularity" — or must you purge and "physic" every day or two to avoid sick headache, dizziness, biliousness, colds, or sour, gassy stomach?

Dr. Caldwell's Syrup Pepsin helps to establish natural, regular bowel movement even for those chronically

constipated. It never gripes, sickens or upsets the system. Besides, it is absolutely harmless and pleasant to take.

Buy a large 60-cent bottle at any store that sells medicine or write "Syrup Pepsin," Monticello, Illinois, for a FREE SAMPLE BOTTLE and just see for yourself.

Contractor and Builder

Love's Ecstasy

by May Christie

WHAT HAS HAPPENED SO FAR.

ALEDA RAY, pretty blue-eyed country girl, working in New York as a stenographer, is in love with Gary Chester, young engineer. She is living at the home of Marise de Rense, proprietor of the Harvest Moon cabaret. Marise, elderly and hard-working, is infatuated with Clive Mortimer, ne'er-do-well Englishman. The latter schemes, secretly, with Goldie de Rense, younger sister of Marise, to operate a private "post office" for blackmail. Marise faints upon learning the name of Alede's employer. W. B. Lingard. She warns Alede to leave his employ but does not explain why. That day, at the office, Alede sees Gary Chester drive off with the Countess Dellamanc, Lingard's niece.

NOW GO ON WITH THE STORY.

CHAPTER XXIII.

THE Countess Dellamanc was extremely bored.

In her Louis XIV bed in the smart Park Avenue hotel she awoke to a new day.

She yawned and stretched amid the perfumed linen sheets and lacy little pillows.

Oh! to lie here forever, dreaming happy dreams and never be awakened!

What was the good of rising and facing another day that, in its boredom, would be exactly like its predecessors? Life, despite her beauty, wealth, position, was stale, flat and unprofitable!

Thus mused the Countess Dellamanc, whom a number of people envied, but whom (so she assured herself, in her super-egotistical way) never had been "understood."

"I understand you only too well, cara mia," her handsome Italian husband, Count Mario, had said. (How he had maddened her!) "You are bored so with life because you are what the English word?—a monomaniac? You think—first, last and always—only of yourself!"

At that she had been furious. Lately, in the last stormy year in Rome, she had indeed been angered—and extremely disagreeable—most of the time.

She had lived so hard, and yet—despite her three marriages—achieved so little in the way of real happiness!

Her goals had fluctuated so. Beginning "life" at sixteen when she ran off from boarding-school with a member of the local vaudeville house orchestra, she had learned—first, passion—and then, misery!

Her people had annulled that marriage, but not before the victim (the Countess Dellamanc) always took the martyr's role, and never blamed herself for her own blunders.

hers) had gained a first-hand and extremely sordid view of life.

Some years later came her loveless, mercenary union with the rich broker, Schumph.

Grown accustomed to his wealth, and having every whim gratified, the main idea of the lovely Inez was to maintain as great a distance as possible (metaphorically as well as literally) between the elderly husband and the young wife.

He was a bad sailor, so she went off frequently on yachting trips.

He was not musical, so she insisted on a box at the opera throughout the season, and amidst her galaxy of squires, the fat, homely "good provider" was not missed.

She cultivated society with a big "S." Despite her husband's wealth, it was an uphill climb. Inez's temper—never of the best at any time—was considerably impaired by social snubs.

She "flashed" about, however, beautifully gowned and jeweled. Her villa at Newport (the elite gave her many a rebuff!) was a dream of a place.

And wasn't her houseboat down in Florida a floating palace?

She went off on many trips to Europe, in pursuit of clothes and culture—Paris being the hub of the universe, she said, for a woman of her mind. She had periodical fits of declaiming American men as "boorish" . . . her remarks were sometimes quoted in the papers, and were not entirely kind.

Nor tactful. Nor was her behavior all it should have been, the busybodies said. Wasn't she cited as co-respondent in a divorce case that began in Vienna and ended in New York, and even though it was all a matter of spite—so went the lovely Mrs. Schumph—and her name was withdrawn, and her husband (who was quite kind and

sympathetic in the matter) seen about again with her in public, "there is no smoke without fire," declared her critics, who were numerous.

Having married a man who was old enough to be her father, Mrs. Schumph, however, soon drifted off on her own tack. While at Shephard's Hotel in Cairo, she found a hectic and fabulously rich admirer in an Egyptian of high rank.

Her beau's latest wife, unfortunately (he had his own harem!) misunderstood the situation, and one moonlit evening followed the couple in one of her husband's cars out to the Pyramids, there quitting the machine and proceeded to pursue the pair, on camel-back, to the Sphinx.

The Arab guides informed the furiously jealous Oriental that the lovely American lady and her escort had departed—and a malignant smile seemed to decorate even the granite-hewn features of that notoriously inscrutable creature, the Sphinx!

The Egyptian wife rushed back to Mena House (which is near) and found her truant spouse and Mrs. Schumph imbibing champagne cocktails. She flung a knife—being an uncontrolled lady of the harem—and the "lover" as a souvenir bears, on the neck, a slight scar to this day.

Her embassy advised the well-known "flight out of Egypt"—and when Mrs. Schumph was out of the nursing-home she caught—at Alexandria—the next boat.

Back in New York, she found the patient Mr. Schumph—since even a worm will turn, and one bad turn deserves another!—had become interested in little ladies of the chorus.

Al! here was her chance to get (with enormous alimony!) a divorce!

But little pitchers have long ears. Mr. Schumph was little. His ears were not his prettiest feature, being protuberant, but they were long! And he had heard too much about her "gigolos" in Paris and in Deauville—and last, but not least, the little "affaire" of the Egyptian.

He refused her request in plain and rather brutal language. There would be no divorce . . . no reconciliation . . . and he would cut off her allowance . . .

"What on earth am I to do?" sobbed Mrs. Schumph.

(Continued Tomorrow)

PHOTOGRAPH SHOT ON HARDEST STEEL

Image Reproduced by the "Munroe Effect."

Washington.—Shooting a photograph into the hardest of chrome steel with the aid of high explosive nitrogelatin and so making a photographic record as permanent as the steel itself, is the feat that has been accomplished as a result of the "Munroe effect." This effect was the discovery of Dr. Charles E. Munroe, veteran explosive expert of the United States bureau of mines here. An incidental result of the work is proof that the blacks in a photograph print are due to varying thicknesses of finely divided silver, the thicker the deposit the darker the shadow in the photograph.

How Photograph Was Made.

The steel photograph was made recently by G. St. J. Perrot, superintendent of the bureau of mines experiment station at Pittsburgh and sent by him to Doctor Munroe. To make it a photograph of Doctor Munroe was laid on a piece of steel about two inches in diameter and an inch thick. On top of this was placed a disk-shaped piece of the nitrogelatin explosive, which was then fired. Though the paper photograph was completely destroyed, when the steel cooled sufficiently to be handled the profile of Doctor Munroe was found impressed on the surface. Where the photograph had been black, that is, in the shadows, the surface of the steel was raised, and where there had been lights the steel was incised.

Another example of the effect that is in Doctor Munroe's possession now was made by W. O. Snelling, director of research of the Trojan Powder company. In this case the words "Munroe Effect" were impressed into the surface of a block of the explosive, so that the letters were in intaglio. When this was exploded on a disk of the steel the letters appeared on it. However, they were also in intaglio on the steel. This is the opposite from what would be obtained with a die, for then the intaglio letters on the die would come out in relief on the finished product.

Doctor Munroe explains the effect by saying that when the detonation of the explosive occurs, the entire amount of the solid is converted to gas. This volume of gas, however, momentarily has the same size and shape as the original block of the explosive and is therefore extremely compressed. Where there was a cavity in the original explosive is the line of least resistance for the escape of the rapidly moving gas molecules. In seeking to escape they collide with each other, producing a vast number of tiny molecular drills, which bore into the hardest steel.

Blew Safe by Method.

Using the same principle, Doctor Munroe once blew a hole in a safe with a hollow cylinder of dynamite. He took a bundle of sticks of dynamite, then, by pushing a tin can through the center, he pushed out the center sticks and bound together the other ones so as to form a ring. This he exploded in a vertical position upon a safe. The result was a hole in the top of the safe corresponding to the hollow center in the ring of dynamite sticks. This hollow cylinder had acted as a gun to fire the gas molecules through the steel.

Any thin object, such as a leaf or photograph, can be reproduced on steel in this way, said Doctor Munroe, and so a permanent record can be obtained. The explosion has the effect of greatly magnifying slight differences in thickness—such as between the layers of silver in the shadows and highlights of the photograph.

Hapsburg

Hapsburg, meaning "Owl's Castle," was a castle which stood in the canton of Aargau, Switzerland, the reputed cradle of the Hapsburg dynasty.

Minerals in Milk

Mineral constituents of milk that are especially important to the body are phosphorus, iron and lime.

DR. W. B. CALDWELL AT THE AGE OF 83

BRET HARTE HERO FOUND IN SWEDEN

Original of Arizona Peter Is Old and Blind.

Stockholm.—The original of Arizona Peter, Swedish hero of one of Bret Harte's stories, has been discovered by a Swedish newspaper to be still alive. He is living in the village of Smedjebacken in his native province. The old Wild West hero is, however, totally blind. His real name is Per Erik Aastroem, and he is now seventy years old.

Aastroem left Sweden in the early '80s for the West, where he, like many other Swedes, entered the United States garrison service.

Arizona Peter earned a reputation for enterprise and daring. Once when he found a Sioux chief half unconscious, bound and gagged, he got off his horse and saved the Indian. The sweetheart of Aastroem, however, was in Sweden, and, wishing to marry her, he got her a position at a neighboring farm, owned by a Scotch woman.

Shortly after her arrival she and her mistress were captured in their home by a plundering band and carried off. Accompanied by Gray Bear, Sioux chief, Aastroem dashed across the Mexican border, surprised the brigands and rescued the women.

He then rode away and halted on the slope of a narrow canyon through which the robbers had to pass, as Bret Harte tells the story. There the Swede and the Indian shot down 50 of their foes.

One day Aastroem struck a copper vein in the mountains, and soon a group of engineers and miners began to exploit the find. But his fiancée deserted him to marry one of the mining engineers.

In grief Aastroem returned to Sweden, where he found work as a stone cutter. Through an explosion he lost the sight of both his eyes. Since then he has been a brushmaker.

Potato-Tomato Union

Good Graft for Farms

St. Louis.—A "good graft" (not of the political variety) which anyone may try and which will reward a little patience with a double crop is described in a recent bulletin of the Missouri Botanical garden. It consists of a tomato vine grafted on a potato stock, which yields tomato fruits above and potato tubers below.

The graft is fairly easy to make, it is stated, requiring no more skill than is needed for a similar operation on an apple twig. Apparently the first one on record was made over a century ago by an amateur scientist named De Tchudi, who reported his experiments to the Horticultural Institute at Fromont, in France.

Neither partner in this double plant body seems to have any influence on the other. The tomatoes are like those of sister plants grown on their own roots, and the potatoes differ in no way from those grown in the ordinary way from other eyes cut from the same parent tuber.

Truth Requires Courage
